

Incline 3

Incline 2

FOR IMMEDIATE RELEASE:

Capture the Minimalist Trend with These Ultra-Versatile Sink Options.

MTI Baths Expands its Popular Incline Sink Series.

(Sugar Hill GA - May 19, 2021) Imbued with a sleek, minimalist style the Incline Sink Collection has quickly become a favorite thanks to its many different options for installation - truly making it one of MTI Baths' most versatile products! Building on the popularity of the original, the brand is now offering additional sizes and a custom undermount option for bespoke orders. The Incline 2 and Incline 3, and a Custom Undermount Sink all feature the striking sloped bottom that adds a fresh and unexpected geometric element.

A smart choice in terms of both style and practicality, the line's signature incline design runs from the front to an integrated slotted drain along the back of the sink bottom. The bowl size of the Incline 2 is a generous 19" x 13" and the Incline 3 trough sink measures 40" x 13". The Custom Incline Undermount allows customers to specify exact lengths for unique applications, with either a 13" or 15" bowl depth configuration. They are offered in either white or biscuit, with a soft matte or hand-polished deep gloss finish.

As part of MTI's beautiful Boutique Collection of tubs and lavatory sinks, all Incline sinks are handcrafted of solid SculptureStone® for a molded stone look that is durable, eco-friendly and easy to maintain. Offering exceptional versatility, the Incline can be installed as an undermount sink, or can also be ordered as a Counter-Sink or Vanity Sink, where the sink bowl is fully and seamlessly integrated. The Vanity Sinks can be specified with either Parsons-style legs or waterfall-style side on two sides or only one for design and installation flexibility.

For more information about the recent additions to the Incline sink collection or any MTI product line, visit www.mtibaths.com.

About MTI Baths.
