PRODUCTS FOR  
GREEN/SUSTAINABLE  
FACILITIES

MARCH 2014

## GLASS + GLAZING

An intrinsic part of modern buildings, glazing can be an architect's boon—or bane—depending on how much it is being used, how it's oriented and its physical characteristics.

But for as many uses of glazing that designers can envision—such as the dual facade of Pomorski Park in Gdynia, Poland—there is almost an equal amount of options, which can drastically improve an envelope's performance.

### Unique and Functional New Surface

Krion new-generation solid surface material is smooth to the touch like natural stone, but has the flexibility to be molded like plastic. Ideal for both demanding interior and exterior applications, Krion is a Class A fireproof-rated surface that has little to no maintenance needs. The non-toxic material also has inert hygiene properties and is easily repairable. Available in multiple color options. **Circle 508**

#### Porcelanosa USA

Category: **Doors • Hardware**

### Doors and More

Showcasing Simpson's latest offerings, the company's updated catalog includes Artist Collection doors, Plantation Louver doors, new contemporary exterior and interior doors and expanded designs in the Selects Series, Mastermark Collection, Craftsman Collection, Traditional Doors and Exterior and Interior French door product lines. **Circle 507**

# Green by Nature

Ultra-tec cable railing systems are composed almost exclusively of stainless steel (typically Type 316). Stainless steel has always been green. It's a waste-free product, 100% recyclable into the same (or a different) product with no reduction in quality. Friend to the environment. Friend to your LEED credits.

**Ultra-tec cable railing is both see-through and transparent!**

### Waterfalls

Michael Graves' practical and clever takes on a stainless steel channel provide whimsical shower drain designs for universal design requirements. Stream is a fluid design, and Cosmo makes a contemporary statement. **Circle 506**
