NEW AND IMPROVED

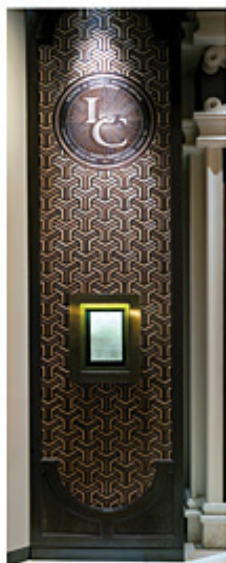

WALK THE PLANK

A modern, luxury hardwood, **Kingsbridge Oak** is part of the BR-III Reserve Collection. Kingsbridge Oak effortlessly blends contemporary and rustic with a brushed texture. The incredibly wide 8-in. plank flooring is as durable as it is beautiful. It's 1/4 in. x 8 in. and 30 to 84 in. in length, with a 5-mm wear layer. Visit www.bnm.com or **Circle 481**

CAVEMEN WELCOME

In creating a warm and inviting atmosphere for the chic wine lounge, dubbed La Cave, at the Wynn Las Vegas, the challenge for the Chicago-based design and fabrication firm **555 International** design team was to create something that appears private and exclusive, while feeling warm and inviting to guests at the same time. Paying homage to the wood casks used in wine making, the firm chose to incorporate several wood elements to warm up the feel of the cave-like environ. Guests visiting La Cave will notice the beautiful wood marquetry inlay panels that meticulously feature its engraved logo, surrounding the "cave-like" revolving door entryway. The

Cave features cobblewood flooring in oak with a detailed ribbon inlay, while the carved teak ceilings of the tasting room complement a main wall lined with plants. Visit www.555.com or **Circle 480**

ARCHITECTURAL
TILE SOLUTIONS

MARAZZI USA

Tile Shown: Treverk Capuccino

Tile Shown: Treverk White

Tile Shown: Treverk Deco

Treverk | Color Body Porcelain Stoneware

All the best characteristics of color body porcelain stoneware – practical, easy to clean, impervious – combine with the warmth and graining of natural wood, becoming **TREVERK**.

Available in three rectified sizes - 6"x48", 8"x48" and 12"x48" - with incredibly natural graining due to the latest in digital print technology.

Contact us at contact@marazziarchitectural.com or 800-820-8453 or to find a distributor in your area.

INDESTRUCTIBLE SIDING

Accoya wood is appropriate for siding applications. Accoya undergoes a modification process called acetylation that renders it an unrecognizable wood source, preventing fungal decay without the use of toxins, while increasing strength and dimensional stability. It's being used in a variety of exterior applications, including siding, decking, windows and even bridges. Visit www.accoya.com or **Circle 479**
