MARCH 2010

SPECIAL ISSUE: Sustainable Products + Materials

Believing in biomimicry. As the community delves deeper into sustainable design, practices must transition from use of products, systems and materials marketed with leafy packages to strategies that mimic the function of natural vegetation.

SPECIFIERS' SOLUTION

Saving Water at Atlanta's
Grand Hyatt Hotel

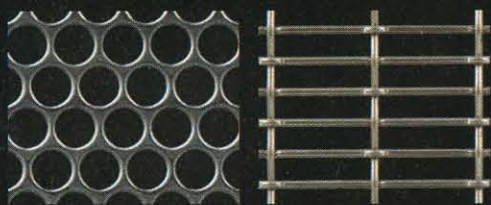

Dual Solution

A dramatic mural of **McNICHOLS®** Perforated Metal catches eyes for the Mercy Medical Center's parking garage in Baltimore, Maryland.

The street level of the garage also utilized the hospital leaf logo. Both Perforated and Wire Mesh panels provided security, visibility and ventilation.

Perforated Metal

- 5/16" round holes on 3/8" staggered centers
- .063 anodized aluminum

Wire Mesh

- 5/8" mesh x 2" mesh
- lock crimp/plain weave
- .162 aluminum

PRODUCT FOCUS: Metal

Metal

SOPHISTICATED

The Meridian Series of door hardware from **Ashley Norton** encompasses classic geometric shapes and gives them a modern twist with a sleek aesthetic that complements a variety of decors. This interior door series is available in four functions: privacy, passage, single dummy and thru-bolt dummy. It has a 4.875-in. lever length with a base measuring 2.5 in. x 2.5 in. Norton offers a variety of decorative finishes for its architectural hardware. Options for the Meridian include polished brass, satin chrome, satin nickel, polished chrome and pewter, and oil-rubbed bronze that will patina over time. The Meridian is also available in designer finishes: distressed antique, distressed pewter, polished nickel and unlacquered polished brass. Visit ashleynorton.com or Circle 406

SUSHI SAMBA

The interior design of the Takeya Japanese Steakhouse dazzles customers with visual interest and exciting features. **Möz** decorative aluminum sheets as artwork, decorative hanging mobiles, illuminated column covers, faux ceilings, lighting fixtures and wall panel elements work together to create a dynamic and unusual backdrop. The selection of subtle colors included Champagne, Clear, Salmon and Chocolate combined with Kelp, Waves and Thunder & Clouds patterns. Aluminum sheets are 80% post-industrial recycled material and contribute to LEED 2.0 MR Credit 4-Recycled Content. Visit mozdesigns.com or Circle 404

FINAL TOUCH

Flexible woven metal fabric from **Cambridge Architectural** elegantly defines space by hanging as a curtain on circular tracks around a circular seating area, a multimedia room and a multifunctional stage on the pool deck at the Cirque Apartment Residence in Dallas. Landscape Interiors System lavishly defines space inside the posh space. Cambridge's mesh panels are elegantly draped on various circular tracks throughout the building's 7th floor pool deck, the Orbit Lounge. Visit cambridgearchitectural.com or Circle 405
