Materials

ReMix from 3form is made of fused slices of the company's Varia Ecoresin trim. The decorative panels are made of 77% pre-consumer recycled content. ReMix panels can be used for vertical applications (including doors, partitions, and wall features) and ceilings (such as in the company's Shapes series) and can also be specified in the pre-packaged Ready-to-Go option for walls, suspended forms, lighting elements, and other architectural features. It is less expensive than Varia Ecoresin and is available in five color themes and two pattern directions (parallel and offset). 3-form.com • Circle 511

Bona **Traffic HD** is a two-component commercial waterborne finish for wood flooring that emits 40% fewer VOCs than comparable products and dries in two to three hours. Twenty-four hours after application, Traffic HD demonstrates greater scratch, scuff, and chemical resistance than urethane finishes. The finish has been Greenguard Children & Schools certified. It is available in three finishes (satin, semigloss, and extra matte) and is clear and colorless, which allows the color of stained or natural wood floors to stay true and makes touchups easier. mybonahome.com • Circle 512

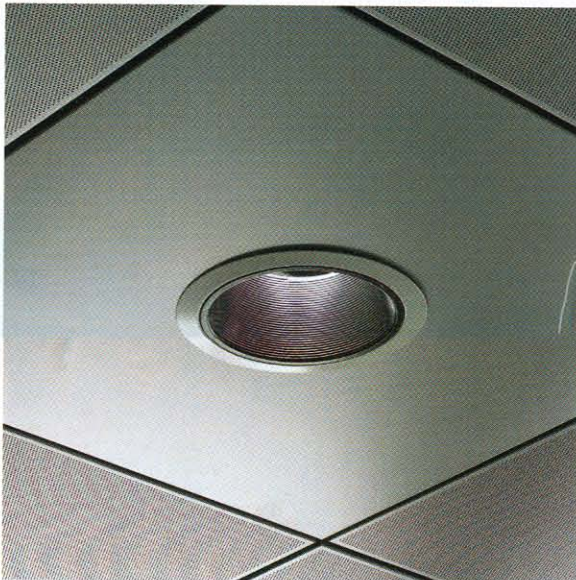

Pyrolave **work surfaces** are made of Volvic lava stone—extracted from craters in Auvergne, France—which is imbued with colored enamel before being fired at 1,000 C. Suitable for residential and commercial kitchens, bathrooms, swimming pools, fireplaces, and outdoor spaces, the work surfaces can withstand high temperatures, acids, and corrosives. They are available in 16 matte and 16 glossy and custom colors and can be sculpted into extra-long lengths without visible seams. pyrolave.com • Circle 513

Color Juice Silicate Concrete Colorant from American Decorative Concrete is a UV-stable pigment coloring system that can be applied to existing concrete. It uses 100 particle-size pigments (similar to those used in ink-jet printers for high-resolution photographs) for even penetration into a slab surface and includes an integral hardener that bonds pigment to concrete to protect color and enhance surface durability. Engineered for exterior or interior concrete, Color Juice is packaged as a concentrate (in 12 translucent and 16 pastel colors) and requires little cleanup. It can be used with Color Juice exterior or interior sealers. adcsc.com • Circle 514

OW-Low Iron is part of Pilkington's Profilit line of linear glass systems. Its low iron content increases visible light transmission (up to 90% VLT in uninsulated channels) and has less of a green hue than standard glass. Consisting of cast-glass channels in an extruded metal perimeter frame, OW-Low Iron is suitable for interior and exterior applications and comes in lengths up to 23' for vertical or horizontal installations. Three textures are available (Standard Cast, Wave, and Macro), and additional options include a low-E coating and Nanogel aerogel, a lightweight insulation material. tgpamerica.com • Circle 515

InPro Corp. has added two new textures to its line of **rigid sheet wall cladding** products—Velvet and Pebblette. Easy to clean and available in standard colors, Velvet offers a subdued finish for vertical wall cladding. Traditional Pebblette comes standard for IPC rigid sheet products, is available in hundreds of colors and patterns, and offers abrasion resistance and defined coverage. Both textures come in 0.040" and 0.060" in rigid vinyl and G2 Blend made from BioPolyPETG+ material, the company's blend of PETG, biopolymer, and recycled content. inprocorp.com • Circle 516

Interiors

Designed for hospitality applications, Merit Select's **Lavish Luxury** from Durkan, a brand of the Mohawk Group, is an upscale carpet made with SmartStrand Contract with DuPont Sorona, a renewable polymer. All products in the collection are piece-dyed, allowing for better color retention and flexibility. The line comes in 18 colorways and features two line patterns, Elated Grace and Refined Charm, in 36-oz. construction. Specifiers can choose from 16 additional Merit Flex patterns in small-, medium-, and large-scale designs that can come in 32 or 36-oz. constructions. Custom colors and patterns are available. durkan.com • Circle 401

Milliken's **Rinascita** collection of floor covering pairs recycled leather tiles from Spinneybeck with reclaimed and recycled carpet backing. Rinascita—which means revival or rebirth in Italian—is available in two embossed textures, bufalo and castoro, with a hand-rubbed finish. The finished face substrate of the 50cm square tiles is made from post-industrial content from leather manufacturing, and the optional cushion felt backing is made from nylon 6,6 post-consumer carpet for a total of 95% recycled content. Tiles can also be specified unbacked as 3mm material to transition to hard-surface flooring. millikencarpet.com • Circle 402

Victoria + Albert's **Barcelona Collection** is inspired by the eponymous city. The tub features a rimless, double-ended design and measures 70 1/4" long. Made of EnglishCast, a composite material made of finely ground volcanic limestone, the Barcelona tub is cast in one seamless piece that won't crack or flex and finished in glossy white solid surface. The Barcelona vessel basins can be installed on their own or as a pair, and are also made from EnglishCast. They are 25" long by 13 3/4" wide by 6 1/8" tall. The tub and basins are part of the company's Premium Collection of bath fixtures. vandabaths.com • Circle 403

Main Street porcelain stone tile from Crossville features a neutral color palette and subtle stone look. The tile has a high coefficient of friction rating and contains pre-consumer recycled content ranging from 4% to 20%. Five colors are available: cinema champagne, café caramel, bistro brown, gallery gray, and boutique black. Sizes include 18" by 18", 6" by 18", 12" by 12", 6"-by-6" field tile, and 2"-by-2" mosaics mesh-mounted on 12" by 12" sheets. Single bullnose and cove base trim complement the collection. crossvilleinc.com • Circle 404

Gladius Metal Ceiling Panels from Hunter Douglas feature Stab-and-Click Technology that enables faster ceiling installation. The system's panels stab into the grid on one side and snap into place on the other, allowing for an extremely flat face. A lay-in, 24"-square tile, Gladius will not bend or warp under pressure from the surrounding grid and is made with a minimum of 70% recycled content. The panels have a square-edged 1/4" reveal and accommodate lighting, diffusers, speakers, and security devices. They are completely point- and downward accessible, and trim systems are available, as are a number of finishes. hunterdouglascontract.com • Circle 405

Humanscale's **Float** is a height-adjustable table that encourages users to spend their time alternating between sitting and standing in order to avoid unhealthy static postures. The table allows for one-handed, tool-less counterbalance weight adjustment (zero to 170 lbs.) and constant-force height adjustment up to 20". Float comes in widths ranging from 42" to 72" and can be used with any manufacturer's table tops. It is made of recyclable steel and aluminum with minimal parts and manufacturing processes. Float meets BIFMA requirements for load and capacity. humanscale.com • Circle 406
