Curtain panels, picture frames, waste cans, lighting, bath accessories, and mirrors: Brooklyn, N.Y.-based artist and trained sculptor William Harvey has designed them all. Harvey's new line of cabinet knobs and pulls for **Du Verre Hardware** further expands his portfolio. Made from recycled aluminum, the geometric hardware can be finished in white, oil-rubbed bronze, or satin nickel (latter two shown). Sizes of pulls include large, medium, and small, ranging from 1 $\frac{3}{4}$ " to 4 $\frac{3}{8}$ " long. Knobs (not shown) are  $\frac{3}{4}$ " square by  $\frac{1}{4}$ " deep. Each piece is finished by hand. [duverre.com](http://duverre.com) Circle 100
