Market of Choice: Products and Trends for

## hotel+hospitality

Opulence has been *de rigueur* for many hotels, but a tightening economy is pushing the industry to transform itself into one that looks to take advantage of existing assets, while implementing a few high-tech tricks.

# Aerix

Adjustable Speed Dryers

Bradley  
www.bradleycorp.com

QUIET ADJUSTABLE FAST

and always handsome.

Bradley introduces Aerix™ - the only adjustable speed hand dryer in the USA. Turn the speed up for fast drying at the sports center, school or water park. Turn down for quiet operation at the library or museum. New low-profile Aerix hand dryers are handsome and suit all applications.

ADA-Compliant & Retrofit's a Snap!

## CONCRETE STONE

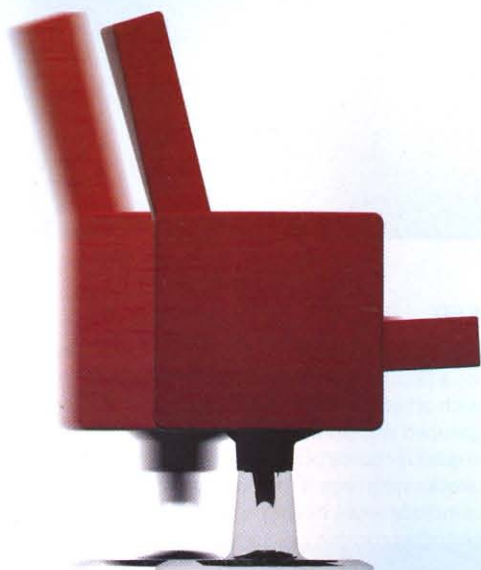

Concrete countertops have been used for over 50 years on the West Coast and even longer in Mexico and throughout Europe. **J. Aaron** introduces an exciting collection of handcrafted cast-concrete stone countertops that add an organic minimalism to kitchen design. The stainless concrete is a high-tech mixture of natural components of mostly portland, sand, gravel and water—a healthy alternative to granite countertops, which may emit VOCs. When polished and sealed correctly, the 100% stain- and acid-proof concrete stone looks and functions beautifully as a countertop. The 2-in.-thick stainless concrete countertop, shown here in a trowel finish, is available in a wide variety of nature-inspired colors and can also be color-matched to any Benjamin Moore paint chip. J. Aaron uses a zero-VOC, water-based, hand-applied stone sealer. Visit [jaaroncaststone.com](http://jaaroncaststone.com) or Circle 492

## TAPED TOGETHER

The environmentally friendly flooring-installation tape system Nora dryfix by **Nora Systems** permits immediate traffic upon completion of installation, resulting in operational time and cost savings. GreenGuard certified, the flooring emits no harmful toxins or odors and is ideal for hospital, school and laboratory applications. Visit [norarubber.com](http://norarubber.com) or Circle 491

#### ← TECHNOLOGY IN MOTION

**Figueras'** RT System consists of an aluminium base that allows for both 360-degree rotation and a linear back-and-forward movement of up to 180 mm. Because both movements can occur simultaneously, the chairs are easy to enter and leave—and since chairs are fixed to the floor, this can be accomplished without bothering other occupants. No sound is produced when the seat is moved, and when vacated, the chair returns automatically to its initial position, ensuring that an orderly appearance is maintained at all times. The system is recommended for installation in parliaments, state and federal governments, courthouses, meeting halls and council chambers. It is also well suited to projects requiring a table to hold multimedia and communication devices. Because of the dual movements of the chair base, vacating the chair without disturbing its position is extremely simple. Visit [figueras.com](http://figueras.com) or Circle 482

#### ← GLASS FLOORING

**Stonclad GR** flooring system by **Stonhard** is made of recycled glass aggregate mixed with epoxy resin, amine curing agent, and rapidly renewable and soy-based additives for a long-lasting, seamless, easy-to-maintain flooring. Chemical and wear-resistant, the flooring is suitable for a variety of applications, including manufacturing, food and beverage, retail and educational spaces. Visit [stonard.com](http://stonard.com) or Circle 480

#### ↑ PLYBOO PEAK-A-BOO

Included in The Furniture Guild's Vanity Flair collection are **Plyboo** bathroom accessories. Made from architectural plywood with 100% rapidly renewable bamboo, this medicine cabinet features a semi-recessed, soft-closing pop-up door. Visit [vanityflair.net](http://vanityflair.net) or Circle 479
