Raising Interest

3-D texture brings tactile style to the surface of great design.

Texture proves, hands-down, that opposites attract. This designer favorite adds contrast, making it possible to “feel” with both hands and eyes. Varying patterns and colors create

visual interest, and simple

tone-on-tone textures change their looks according to light.

Texture is on the rise, and our picks will help you add the perfect touch.

Why Texture?

Texture enhances shapes and silhouettes and creates a stunning visual counterpoint to all-smooth surfaces. It also masks scratches, dents, and water spots that often plague kitchen surfaces.
