MAYA ROMANOFF

mayaromanoff.com

Finished in the company's Chicago studio, Ajiro Chevron is a hand inlaid wood veneer with a seamless sidematch. The wallcovering's micro thin wood-on-paper backing is flexible enough to wrap columns and corners.

24 STUDIO TWIST

studiotwist.net

Inspired by the majestic African ecosystem, the Serengeti collection blends layers of solids with tweed yarns to create patterns that evoke pottery, tribal mud cloth, mountain peaks, arrowheads and feathery graphics. The fabrics are knit with anti-bacterial and colorfast polypropylene yarns.

25 MTI BATHS

mtibaths.com

Halo's circular design creates a compact profile that is deep enough for full-body immersion. Fitted with a built-in seat, this bathtub is constructed of the company's proprietary Engineered Solid Stone, a non-porous mixture of natural, ground materials and resin. The unit offers a combination of therapy options.
