The Console combines two very different materials, marrying a simple slab integral sink in Carrara marble or honed basalt with a brushed stainless steel base for storage. The piece also makes

the towel bar unnecessary.

Lucite® cast acrylic is the material used to make MTI Whirlpools' Metro Collection, chosen for its light weight, and scratch and stain resistance. The grouping includes

the streamlined Metro 4 sink, which is available in a variety of sizes and 50 colors. The collection includes a matching tub with an 11-inch deep front deck area for easy access.

With all the options available, it is clear that plumbing fixtures are easier to integrate into streamlined designs and go farther in offering added convenience to guests. **BD**
