LED LIGHT FIXTURE

VTLED is a high-performance LED fixture for ambient applications and general-purpose illumination. It features intelligent controls and flexible design at a good value. VTLED smart luminaries are embedded with nLight technology. The plug-'n'-play functionality can be configured to achieve energy savings virtually immediately. Smooth continuous dimming functions are standard. VTLED is available in 2x2 and a 2x4 configurations.

THERMOSTAT WITH LIGHT ACTIVATION

The new Slimline Platinum commercial thermostat with light activation automatically adjusts HVAC systems based on the level of light, helping facilities save energy and go green. It's perfect for facilities that may be occupied at irregular intervals because it automatically controls the HVAC systems, turning heat or air conditioning on or off based on light levels. The Slimline pre-occupancy fan purge feature can be programmed to freshen the air before the room is occupied.

PAINT TRAYS

The PaintSmart-Trays are paint accessories that offer some unique benefits. One of those benefits is that they can hang either vertically or horizontally. The PaintSmart-Trays are easily portable, making transport up and down a ladder simple. The reservoir has high sides and holds up to two quarts of paint. The trays come with hooks for brushes and slots for paint rollers.

OCEAN-INSPIRED GLASS COUNTERTOP

Think Glass has created a 4-inch glass countertop that looks like the luminescent ocean and glows from within using LED lights. ThinkGlass offers a variety of light colors and even the ability to create a "light show" via remote control with special effects such as flashing and fading lights to create an ambiance.

COMPOSITE DECKING

CaliBamboo's BamDeck Composite is made from 100% recycled materials: 30% recycled bamboo fibers and 70% recycled plastics. It's dense and strong, easy to install and low-maintenance. This decking material does not need to be sealed, painted or refinished, according to the manufacturer.

CABLE FITTINGS

Feeny's new generation of Quick-Connect cable fittings incorporate the company's patented automatic-locking-jaw design and applies it to an entire line of cable end fittings used for fabricating cable railing assemblies installed as infill on deck railings. Swage crimp tools or wedge-type compression fittings are not required. The fittings are designed for 1/8-inch diameter, 1x19 construction stainless-steel cable.
