Centor Architectural. The S1E screening system combines the company's insect screen with a privacy blind. For summer days, the blind can be pulled out to block solar heat gain; in winter, it can help retain the home's heat at night. The shade, made of tightly woven PVC fiberglass mesh, is available in privacy or shade fabrics for varying levels of translucence. The screen and blind slide horizontally along separate tracks. 866-255-0008. www.centorarchitectural.com. Circle 183.

Atlas Homewares. The Canterbury collection combines eye-catching red-and-black or black-and-white designs with burnished bronze accents and a lacquered finish. The line includes 5-inch and 7-inch pulls and a knob with a 1½-inch diameter. 800-799-6755. www.atlashomewares.com. Circle 184.

TimberTech. Available in cedar or gray colors, ReliaBoard decking offers homeowners an alternative to wood decking that features the durability and low maintenance of composite at a lower price point. The boards feature a flat-grain surface and a square edge, and are available in 12-, 16-, or 20-foot lengths. The maker is offering a 25-year limited, one-time transferable warranty. 800-307-7780. www.timbertech.com. Circle 185.
