Eyefuls of bathrooms
and tiles

Clean Start

Bathrooms have long abandoned simple utilitarian purposes and now conjure notions of spa-like tranquility and places of meditation.

Compiled by Peter Sobchak

Milano Collection | Fantini

The Milano Collection, designed by Franco Sargiani for Fantini, is an entire line of bathroom showerheads, shower panels, faucets and handles, with the newest addition being the MilanoSlim and MilanoSlim Outdoor, introduced in 2016; both feature a multi-functional in-wall shower panel with thermostatic mixer, rainfall showerhead, body sprays and hand shower. www.fantiniusa.com

6 Pebble | Ronbow Northern California-based luxury bathroom furnishings manufacturer Ronbow has partnered with French designer Ora Ito on the new Pebble collection, an organic bathroom vanity and sinktop (plus LED mirror) and wall cabinets. Soft, organic and asymmetrical, this range is unified by a glossy white finish that acts as a canvas to showcase the "pebble-like" shapes and curves. www.ronbow.com

7 Font | Scavolini Units with drawers, pull-out baskets, wall units, horizontal and vertical cabinets and open-fronted compartments in various depths are the elements that make up the collections in the new Scavolini Bathrooms range. The Font line is characterised by a glass door: the 4mm sheet of glass is applied to a panel lacquered in the same colour as the glass. It can be opened through push-pull systems or a handle with glass insert at the centre of the door (seen here are base units, side facing panels and wall-mounted cabinets in Ruby Red polished glass). www.scavolini.com

8 Pescadero | Victoria + Albert Inspired by the sea, and named after the picturesque seaside town in Northern California, Victoria + Albert's new Pescadero tub features a dynamically undulating rim that was designed to form a distinctive, asymmetrical wave, and is crafted from EnglishCast, a finely ground volcanic limestone mixed with resin. www.vandabaths.com

9 Touch & Steam | Effegibi Featuring state-of-the-art-stream generating technology, the Touch & Steam's touch-screen controls allow the user to adjust steam release, warm air function, unit pre-heating function and white light or colour-therapy lighting. www.eggibi-perfect-wellness.com
