Zone valves

Multi-volt zone sentry valves for hydronic heating and systems such as those with fan coils and air handlers allow one actuator to accept input voltages between 120 and 277 VAC, 50/60 Hz. The valves are available in a normally closed or normally open configuration.

One-piece toilet

Vista II one-piece toilet has an updated design with a modern look. Designed with a rimless wash system, two large jets at the back of the bowl and an open rim allow a significant flow of water to fall directly into the bowl with every flush for maximum washing force. Independent testing validated 1,000 g of solid-waste removal, compared with an industry average of 350 g. The units uses only 1.28 gpf.
