## Contemporary pendant

Taking a cue from 1950s-inspired orbit chic, the Spellbound gold-leaf pendant features a flat-edged, widely spaced spiral with a bold diagonal running through its center. The pendant is LED-ready, low-maintenance, and energy-efficient.

## Recycled hardware

Designed by William Harvey and made of 100% recycled aluminum, the Arroyo collection of cabinet pulls and knobs features sleek channels and clean lines. Its simple geometry implies luxury and ease and is reminiscent of manmade water channels. The hardware is available in five sizes and three finishes: satin nickel, oil-rubbed bronze, and white. All of the company's cabinet hardware is compatible with LEED objectives.

## Swivel chair

Tulip was designed on a carefully proportioned combination of widths and alternating straight and curved lines. Its ability to swivel 360 degrees gives it flexibility in use. The support disc, made with bright, brushed aluminum, reflects a portion of the chair body and emphasizes its round shape.

## Ikat-inspired outdoor fabrics

Outdoor Ikats fabric collection offers a distinctive selection of outdoor upholstery, all inspired by distinctive design motifs of original ikat silks from Uzbekistan. Colors include Clay, a bright and earthy red; Silver, a soft and neutral gray; Lagoon Blue, a complex bright blue; Linen, a natural color resembling un-dyed flax yarns; and Indigo, a rich, saturated blue. The twist on color and geometry creates an up-to-date but timeless take on ikat. The fabrics are woven with Sunbrella yarns for easy cleaning and sturdy construction. Though intended for outdoor use, they have a soft and supple feel that lets them transition to indoor applications.

## Floral-appliqué fabric

Whimsical florals meet a geometric composition to create a strong, contemporary look in Pixie. The design's bold appearance, coupled with its fresh color scheme, makes this introduction ideal for multiple uses. The fabric is 100% IFR Xorel, inherently flame- and stain-resistant. Available in two color combinations—hip charcoal/red or a modern white/yellow—this pattern can also be used on walls, furniture, or panels. It is available in 52-inch or 56-inch widths, with a vertical pattern repeat of 17 3/4 inches and horizontal repeat of 24 3/4 inches. The fabric is Cradle-to-Cradle Silver Certified by MBDC as well as SCS Gold indoor-air-quality certified.

## Collaborative chair

The Chat Chair is a seating concept that combines classroom and lounge furniture and enables students to create comfortable, structured workspaces when and where they choose to collaborate—in classrooms, libraries, lounges, learning commons, and even hallways. The chair is designed to support how students choose to work with one another, featuring an ample back and seat pan to satisfy the desires to spread out and sit comfortably. Rear casters make it easy for students to tilt and move the chair.
