SERVING ARCHITECTS, CONTRACTORS, AND OWNERS IN COMMERCIAL CONSTRUCTION

MAY 2017 Vol. 15 No. 4

**Touch-free faucet**

B3004 vessel faucet has a simple silhouette with no handle. An iSense system provides hands-free operation. The unit operates using five infrared sensors that provide control over 13 functions including temperature and water flow. A pause function, battery back-up, and three user-defined presets are also included. It is available in brushed nickel and polished nickel.

**Drain pump**

Saniflo 1 simplex drain pump for heavy-duty applications connects directly to high-efficiency washing machines and dishwashers and can withstand water temperatures to 194 F. The 1-hp pump unit also resists liquids with highly acidic properties. The pump discharges gray water 25-ft. vertically, 250-ft. horizontally, or a combination of both.

**Narrow-profile louvers**

Narrow-profile louvers can be used for interior and exterior applications where a high free area for improved airflow is required or when narrow frame depth and horizontal sightlines are desired. Applications include those that require exterior grilles for PTAC units. They can be specified with a variety of custom-color or architectural finishes and are available with 30- and 48-deg. blade angles.

**The Right Thin Brick to Fit Your Design**

**METROBRICK®**  
ARCHITECTURAL THIN BRICK

**ROYAL THIN BRICK®**  
Ironrock Since 1868

METROBRICK® has strict sizing to meet the needs of architectural precast, tilt-up and field applied applications.

Royal Thin Brick® is tumbled for a worn/weathered appearance. Royal is most often applied like ceramic tile and is used both commercially and residentially.
