Control system

The company's ACS control system is a flexible controller designed to maximize energy savings in modular boiler plants. The controller reportedly can stage and coordinate the operations of as many as 32 boilers. Used with the company's KC 1000, Benchmark, and Modulex boilers, the controller has a low-voltage, twisted-pair, shielded wire between the panel and boilers.

Compact geothermal heat pump

Envision2 Compact geothermal heat pump is available in 0.75- to 6-ton capacities and uses the Aurora generation of communicating controls. Options include a factory-installed, 24-V, motorized on/off water valve for VFD pumping with automatic internal water-flow control, hot-gas bypass and reheat, and high-efficiency PSC, five-speed ECM, or variable-speed ECM motors. All units use R410A refrigerant.

Most transfer switch manufacturers offer some combination of 3-cycle and short-time closing and withstand-rated switches.

Only Russelectric offers full lines of 3-cycle and 30-cycle rated UL tested, listed, and labeled ATSS and bypass/isolation switches.

Don't settle for less than the best automatic transfer switches... Insist on Russelectric.
