China Pattern >>

Beijing-based Lenova has created hand-hammered copper sinks not far from the gates of the Forbidden City for centuries. The Emperor's coppersmiths use the same tools as they did hundreds of years ago, creating high-quality red metal sinks with a warm cast and fanciful etching. \$799 at Hughes Supply, Fort Myers and Naples.

<< Out of Africa

The sinuous shape of Galassia Italy's Ergo vanity echoes the form of an African bushbuck. Traditionally crafted from solid iroko, aka African teak, the wash basin has a rimless ceramic top with an integrated sink. The vanity is \$2,880; the pure-white basin is \$650 (as shown). Offered exclusively through MILUSA; visit milusainc.com for purchasing information.
