## Stealth Kitchen Hidden in plain sight (Margo\*)

Do you value uncompromised views and uncluttered design? The Stealth Kitchen Module from YesterTec Kitchen Works combines high functionality with sleek design. The modules allow you to only expose what you want, when you want – and the rest stays hidden. Tucked away behind attractive panels that are designed

to blend in, unnoticed, with the rest of your décor, is your entire kitchen. No time to clean your kitchen before your guests come over? No problem. All your guests will see is uncompromised design, not bulky kitchen appliances or clutter.

## Handcrafted Kitchen (Claire\*)

Kitchen appliances disguised as beautiful furniture? It's true! YesterTec's line of handcrafted kitchen workstation furniture effortlessly transforms bulky kitchen appliances into one of a kind kitchen décor. Each piece of furniture is designed to disguise your appliances as custom built-in

furniture. YesterTec expands on the design idea of panel ready refrigerators by making each piece look like a customized piece of furniture, not a kitchen appliance. The result is high quality, formal design without the sacrifice of kitchen functionality.
