The beautiful new **Tubo faucet** collection from Victoria & Albert is sleek and modern, drawing its inspiration from European design. Formed by a single elegant tube curved at 90 degrees, the faucet offers a dramatic profile with an urbane feel. A single lever controls both water flow and temperature, and can be installed at any angle for right- or left-handed use. www.vandabaths.com

With Zen-inspired appeal, the **Tranquility line** from Graff is contemporary in finish and form. Its soft, curving spout brings a light Asian influence to the bathroom. Sloping handles are reminiscent of bamboo shoots, and like their inspiration, their gentle curve is soothing to the touch.

The **Chelsea H125 faucet** is tall, slender and curvaceous. The spout stands an impressive 7.5 inches high, and the handles are 4.5 inches. Cast from lead-free brass, it has a flush stream shaper aerator that tilts, allowing users to control the direction of the water. The Chelsea H125 is WaterSense labeled, meeting strict water conservation guidelines.

Clean shapes are brought to life with unique hammered accents in Watermark Designs' **Sense27 Collection**. Created in collaboration with Clodagh, the renowned designer, Sense27 combines leading-edge technology and innovative materials with water-saving additions. The collection includes a proximity faucet, with sensing capabilities to allow hands-free control.
