Dynamic Duos

Kohler's Veil wall-hung, dual-flush toilet provides 1.6 and 0.8 gpf. Featuring a concealed tank and minimal footprint, the wall-mounted toilet's frame brackets are installed behind the wall, and the bowl is set at a custom height, from 15 3/8 in. to 28 1/2 in.

Duravit's WaterSense-approved DuraStyle wall-hung, dual-flush toilet a 1.1 and 1.28 gpf option. The toilet may be customized to sit between 15 in. and 19 in. to comply with ADA requirements, and is available in compact, standard and elongated depths.

Conceived by designer Stefano Giovannoni, Laufen's Ilbagnoalessi One Floorstanding 2PC Water Closet features soft, round edges. Measuring 15 3/8 in. x 28 3/8 in. x 37 3/8 in., this toilet offers dual-flush capabilities of 1.6 and 0.8 gpf.

Constructed from fine fire clay, the DXV by American Standard Pop Rectangle Vessel Bathroom Sink is available in white, black, matte black and chenille gray. The basin also comes with a ceramic drain cap.

Stylish basins, eco-friendly bowls create winning team

BY MATTHEW MARIN

Today's bathroom sinks and dual-flush toilets should make a design statement while offering a high level of performance. Undermount, vessel and semi-recessed basins offer a multitude of styles, sizes, materials and colors. Semi-recessed sinks, in particular, create a minimalist appearance in the guest bathroom. When it comes to toilets, dual-flush, high-efficiency models (HETs) provide a practical water-saving solution and fewer gallons per flush (gpf). Options include a variety of depths as well as concealed, wall-hung units, to accommodate most interior design schemes.

Gerber's Ultra Flush line offers a dual-flush pressure of 1.1 and 1.6 gpf. The two-piece toilet is WaterSense certified and available in 12-in. and 14-in. rough-ins. The front-mounted, metal tank lever comes with a brass arm.

Ryvyr's pure white Vitreous China sink offers a variety of rectangular, square and round options. It is available in vessel, semi-recessed and under-mount styles.

Toto updates the classic vessel with a sculptural, semi-recessed design for the Neorest Vessel Lavatory. The vessel is available in two sizes—29 1/2 in. x 16 15/16 in. and 23 5/8 in. x 15 3/16 in.—each with a porcelain drain cover.

MTI Baths' integrated Counter-Sink concept connects one fixture to another to create a minimal, seamless look. The sink is made from MTI's proprietary Engineered Solid Stone—a mixture of natural ground minerals and high-performance resins.
