Textiles

Classic Crypton Couture—a collection of textural solids from **Valley Forge Fabrics**—is comprised of two classical textures in 46 colors. All of them feature Crypton technology, offering patented, permanent stain-, moisture-, mildew-, bacteria- and odor-resistant protection with a solution that will maintain the beauty of the fabrics. Classic Crypton Couture fabrics are woven to meet or exceed industry performance requirements, including ACT standards for upholstery, without sacrificing style or functionality. With certain minimums, custom colors are available.

Chairs

Mark David, a custom furniture company, has introduced a collection of ultra-green chairs. These earth-friendly chairs feature materials, as well as manufacturing techniques, that reflect high levels of sustainability, and are suited for guestrooms and public spaces. The products are being made in the company's High Point, NC, facility—which recently installed a solar farm, further adding to the environmental feature of these products.

Furniture

Saccaro's Noronha Collection, inspired by the Brazilian archipelago of Fernando de Noronha, features bold yellows, reds, blues, greens and violets. These bright colors take shape as sofas, armchair loungers, side and coffee tables suited for outdoor living spaces. Designers have a choice of 16 weatherproof, coordinating fabrics. The company is also launching the Canavial collection of tables and chairs, inspired by Brazil's sugarcane plantations, and the Lace and Infinity pieces, which feature traditional braided Malacca fibers.

Bath Design

Cabrits, from **Victoria + Albert**, is named after the Cabrits peninsula on the Caribbean island of Dominica. The bath is crafted from Englishcast, which is rich in volcanic limestone. A fusion of modern art and ergonomics, the tub's curvaceous shape makes it a statement piece, while its contours offer improved support and bathing comfort. The tub uses 46.5 gallons of water at its maximum. The tub measures 68 in. long, 29³/₈ in. wide and 22¹/₈ in. deep.

Vanity

The Armadi Art Aqua Collection from **Topex Hardware** embodies a modern, European design. The waterproof, wall-mounted vanities are available in six series: Glass, Wood, Leather, Colours, Picturesque and Radius. Each vanity series features a streamlined design with either straight or rounded edges, and a surface with bold color, art or material treatments. All surfaces are scratch-resistant, waterproof and humidity-resistant. The interior of the vanity features leatherette-lined drawers; it is available in one- or two-drawer models in 24-, 28-, 36-, and 42-in. sizes.

Carpet

Desso Hospitality—a division of Dutch carpet manufacturer Desso—offers Infinity, its new Axminster carpet collection. The collection, created by UK-based Desso designer Jonathan Curell, takes inspiration from the concept of infinity—most particularly, the Atomium in Brussels, which consists of nine spheres connected via 20 tubes. The collection features deep colors, multiple layers and the shapes of circles in fresh designs.

Floor Lamp

Hellman-Chang presents the Anora lamp as its first exploration into lighting. With its roots in the company's celebrated Z line, the Anora lamp is an exercise in balance and poise. Understated, elegant design and simple yet solid craftsmanship come together to create a graceful presence, according to the company.

Hand Dryer

The **Dyson** Airblade hand dryer creates a 400 mph sheet of unheated air that scrapes hands dry in just 12 seconds. It's powered by the Dyson digital motor and uses up to 80% less energy than warm air dryers, offering significant environmental and cost savings. Additionally, it's the first and only hand dryer to be certified hygienic by the National Sanitation Foundation, said the company.

Lighting

The Glass Bar, a new lighting design from **ThinkGlass**, features LED lights, which allow the bar to follow the theme color of the room. When the central crystal teardrop chandelier changes color, the bar follows suit.

Seating

Beaufurn has introduced the Terza Collection, which offers lounge chairs and sofas that combine comfort and durability. The brushed-steel frame and legs are strong and defined, and they can be upholstered in a wide array of fabrics, including polyester, polyurethane, vinyl, 100% post-consumer recycled polyester and wool/polyamide fabrics.

Glass Fixtures

Tracy Glover has unveiled a sculptural glass statement chandelier and two new sconce designs. The Silver Lining Chandelier (above) showcases hand-blown glass elements suspended on nine individual stainless-steel cable strands. Nine illuminated glass diffusers are interspersed with non-illuminated orbs. The pieces are customizable as to quantity, size shape, pattern and color: three shapes, five patterns, 16 solid colors, three colorways. In addition, the Wickburn Sconce (left, top) features a hand-blown glass cylinder on a rectangular metal backplate, and the Blackburn Sconce (left) features a hand-blown glass diffuser suspended from a cantilevered post, attached to a metal backplate.

Vinyl Flooring

Spacia's Softline Coco resilient flooring features an earthy palette of cool grays and soft browns. The vinyl flooring is available in 18-in. x 18-in. tiles, as well as a cross grain design measuring 7.25 in. x 48 in. Softline Coco has a urethane coating and beveled edges, and is low-VOC products and FloorScore certified, making it eligible for credit contributions within LEED rating systems and many other green building programs. It can be reclaimed after its first lifetime of use.
