A FRESH APPROACH TO HOME & LIFE

Bed & Bath Bedazzled

BY TERRI FERRAGUT

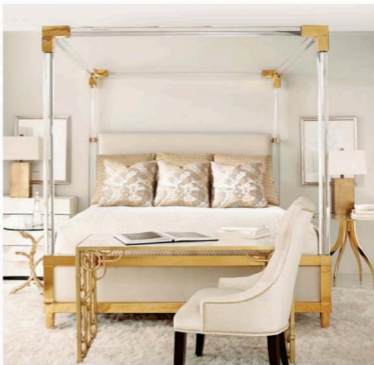

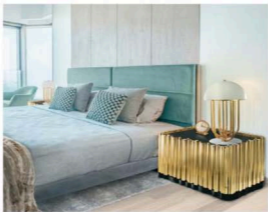

Renewing your home interiors plays an important role in your mental health. Although that might sound a bit odd, it is true; the design of our homes affects our moods. Your home is your comfort zone where you get a chance to leave responsibilities of the day at your threshold, shutting the noises of the world out — an opportunity to garner rest and relaxation.

In this issue, we take a look at beautiful trends for bedrooms and baths, which are fast becoming the second most important

area in our homes next to kitchens. The day spa feeling of “escape” is here to stay with the popularity of freestanding baths (in colors) remaining important elements. Gaining in demand are deluxe showers that incorporate a rain head shower, hand-held shower and side jets for a completely relaxing experience.

From paint colors and a new take on wallpaper and tile to adding gorgeous metallics to your restful sanctuary, you will appreciate the eye-catching beauty of these design trends that 2018 has to offer. ✨
