Based in the Emilia Romagna region, Bertazzoni is the oldest family-owned manufacturer of cooking appliances in the world. One hundred and thirty years ago, the founder Francesco Bertazzoni set out on a journey to capture the hearts of passionate home chefs all over Italy. Staying true to the original vision, Bertazzoni today creates innovative, high-performing and elegantly designed ranges, wall ovens, range tops, cooktops and ventilation solutions.

“Over the past 13 decades, we have focused on understanding what is happening in homes around the world and translated those lifestyle demands into precisely engineered and beautifully crafted products,” says CEO Paolo Bertazzoni. “Our products offer exceptional value without compromise to people and families that enjoy food all over the world. I am proud to stand by that statement, which is at the center of the Bertazzoni promise. That is why our family name is on every unit we produce.”

Bertazzoni continues its tradition of design and innovation excellence with the built-in Professional and Design Series lines, featuring award-winning wall ovens, range tops, cooktops and ventilation solutions. The new line marks several important industry firsts:

- Exclusive high-resolution LCD display with user-friendly touch interface to control the oven functions
- Dual diagonal convection technology for optimal heat distribution on seven levels
- The Assistant - a bank of cooking sequences uniquely customized for nine food categories and equipped with sensors to provide the cook with the optimal cooking results
- Segmented cooktops combining the power of gas, electric griddle and induction cooking in one flexible product platform
