PARTNERING FOR SUCCESS: A SPECIAL PULL-OUT SUPPLEMENT

Architectural Panels Fashioned from EarthCrete

Architectural Panels from Sonoma Cast Stone are made from EarthCrete, a material that is harder, stronger and more lightweight than regular concrete, according to the company. They can be custom made from 3/4" to 4" thick, and can include embedded materials and pigments as well as myriad textures.

Faux Stone Panels Mimic Real Surfaces

High-density polyurethane FauxStone Panels from Outwater Plastics provide the look of stone, brick, wood and other surfaces. UV protected and available in a fire-rated format, the panels visually and texturally replicate the original building materials from which they have been modeled, according to the company. The panels are lightweight, impact-resistant and impervious to adverse climate and weather conditions, so they are suitable for use outdoors.

Shower Delivers Rain or Waterfall

Jaclo's Aquavolo Lumiere offers the option of a waterfall shower or a rain shower in one unit. The horizontal position of the flat spout provides the rain shower; when the spout is down, it becomes a waterfall. The Aquavolo Lumiere also includes a sound system that accommodates an MP3 player, as well as chromatherapy.

Sinks Based on Silversmith Designs

The Vintage Jeweler Collection of metal sinks from Linkasink are made from stamped brass plated in nickel. Inspired by the classic styles of great silversmiths, the collection includes Fifth Avenue Window, Taxco, Sheffield and Pierre (shown). Pierre draws its inspiration from a Cartier tray with classic Deco style.
