Let it Rain!

A luxurious rain shower with a modern twist, Graff's Ski Shower System can offer a relaxing, cascading rainfall or an invigorating shower with massaging water jets. A thermostatic valve allows for pre-selecting a desired water temperature. Self-contained in a pre-plumbed unit, it can be incorporated into most bathrooms.

A Fine Vintage

The aptly named Napa faucet from Watermark Designs recalls the silhouette of a bottle of fine wine. Perfectly proportioned with an elongated arched profile, it's available with three handle options and heights. Choice of pewter, bronze, copper and chrome finishes.

Iron Redux

Fitted with a faucet mount on its rim—which eliminates the need for drilling into precious counter surfaces—the Indio kitchen sink from Kohler Co. is a planet-friendly fixture: The cast iron beneath its enamel surface is made of nearly 100% recycled and reclaimed materials. The exposed faucet deck holds wet items, and keeps drops and splashes inside the basin, keeping the countertop dry.

Farmhouse Feel

J. Aaron's Double Stainless Concrete Farmhouse Sink evokes memories of simpler times but is perfectly suited for the diverse needs of busy kitchens. Made from a stainless-concrete mix, it will patina much like a bronze or brass fixture over time. Custom colors and sizes available; clean with old-fashioned soap and water.
