# Large Bath

Janice Stone Thomas, ASID, CKD | Stone Wood Design, Inc. | Sacramento, CA  
Co-Designer: Aila Richards

## The Stay-cation Spa

This professional couple craved a sparkling retreat to help recalibrate themselves during vacations. Creating the contemporary yet timeless simplicity that the client sought, the renovated bathroom fully enhances the experience of luxury. Soft curves create the flow of space and relaxing tile lines - a floor to ceiling concrete wall creates the focal area of the shower. This partition applies storage niches on one side while the outside curve creates a tiled access where shower water flows, leading the therapeutic sound of cascading water. A sliding door glides easily over the

tile floor for privacy. The sculptural tub appears to float with an elegant silhouette. Chosen over the vanity create the minimal look of all drawers, hiding ornamental pedestals and plumbing traps. Large, beige electrical covers are placed a haker, mirror, picture and a beautiful pebble floor across the shower area. A reflection of water of soap from the rainfall.

## Products
