## BATHROOM LAVS

### High-back lav

American Standard's DXV Oak Hill suite of bathroom fixtures includes a freestanding tub, a high-back lavatory (pictured) with metal console or wood vanity, a high-efficiency toilet, a spread faucet for sink or wall-mount, plus a complementary wood-framed mirror. The 30-in. console lavatory has solid brass legs available in a choice of four designer finishes: polished chrome, brushed nickel, platinum nickel and satin brass. To add storage space, it is also offered with a soft white oak wood vanity or a weathered oak vanity. **American Standard. [www.americanstandard.com](http://www.americanstandard.com)**

### Semi-recessed sink

Gerber's small-footprint North Point sink is designed to partially set into a countertop. The semi-recessed configuration blends the best attributes of pedestal sinks (streamlined style and limited space requirements) with more traditional bathroom vanities (deck space and simple storage). A secure attachment in the back is added reinforcement. The sink (available in white) can be built into vanities that are ADA-compliant. **Gerber Plumbing Fixtures. [www.gerberonline.com](http://www.gerberonline.com)**

### Customizable sinks

MTI Baths' integrated Counter-Sinks connect one fixture to another and are compatible with most manufacturer's vanities. Its length, width, deck height and bowl placement can be customized to any specification with custom colors and designs. This sink concept is ideal for small spaces and narrow baths. It is constructed of proprietary engineered solid stone, a mixture of natural ground minerals and high-performance resins (made of renewable bio-derived and/or recycled content). **MTI Baths.
