BATHTUBS

SOLID SURFACE, TRADITIONAL DESIGN

Cheviot's #4100 Marco solid surface bathtub offers a modern take on a traditional cast iron bathtub while providing durability and easy maintenance. The bathtub features a reclined wall at one end and an upright wall at the other, resulting in a distinctive, modern design. Made of composite resin and hand polished to a glossy sheen, it has a strong and elegant rim profile, with a unique shape. The bathtub's composite resin construction provides insulation that helps keep water warmer for the longest possible time. It features an integrated overflow with matching drain cover and is cUPC-approved. **Cheviot Products. www.cheviotproducts.com**

QUICK DRAIN CONNECTION

MTI's BASICS tub model MBXFSX5832 features an integrated faucet deck to accommodate a Roman Tub faucet, an above-floor rough-in so it can be installed on a slab or to make renovation a breeze, and a quick-drain connection, all in a compact size of 58" long by 32" wide. The other model tubs are available in popular sizes and shapes. Drop-in soakers and whirlpools are ready to ship in five business days; air baths and freestanding models in seven. The tubs are handcrafted, water-tested and quality-inspected. The goal is to provide the plumbing contractor and business owner with handcrafted, quality products that will last. **MTI Baths. www.mtibaths.com**

MASSAGING FEATURE

Americh's Atlas is an extravagant, sophisticated, alluring design specifically handcrafted to appease the aesthetic senses. It offers a clean, sleek ambiance while providing a spacious interior for maximum relaxation. Several accessories, such as the Vibro Sonic Massage feature (pictured), can be included for an escalating, decadent and gratifying experience. It is available in two sizes — 66" x 40" and 72" x 42" — and is constructed with the finest polymer composite. It is a part of the freestanding collection and can be purchased with any system. It is available in all standard colors and compliant with UL and cUL standards. **Americh. www.americh.com**

HYDROTHERAPY SYSTEM

Mansfield Plumbing's Swirl-way Combination Whirlpool and Air Massage Bath System combines the luxury of having a tub with both whirlpool jets and an air massage bath all in one easy-to-use system. Available in 13 models, this bath system includes the Hydro-V backjet system, an inline heater, fully-adjustable jets, chromatherapy light system, ozonator and multi-function electronic keypad. The line includes five different hydrotherapy systems: bathtub, whirlpool bath, air massage bath, combination whirlpool and air massage bath and the MicroDerm therapeutic bath. Durable high-gloss cast acrylic is used to construct each system. **Mansfield Plumbing. www.mansfieldplumbing.com**
