### Linear drain

Noble Co.'s FreeStyle linear drain gives a contemporary element to any shower and allows for freedom in the shower design process. A linear design allows a single-slope shower base and accommodates for the use of large-profile tiles. The FreeStyle is perfect for curbless, barrier-free and handicapped showers in new construction or renovations. Constructed of one-piece, seamless PVC or ABS with no manufacturing seams or weldments, the drain is engineered with a membrane clamping mechanism to ensure a watertight connection with the waterproofing membrane of the showerbase. **Noble Co.** [www.noblecompany.com](http://www.noblecompany.com)

### High-efficiency toilet

Mansfield's new Barrett HET is a 1.28-gpf toilet that reduces the amount of water used on the original model, yet retains the same 800-gram flushing power. The Barrett Suite is part of Mansfield Plumbing's "affordable style" products that range from traditional to contemporary designs. The Barrett Suite also offers matching sink and tub options. **Mansfield Plumbing.** [www.mansfieldplumbing.com](http://www.mansfieldplumbing.com)

### Stainless-steel kitchen faucet

Lenova Sinks' new line of solid stainless-steel kitchen faucets has a variety of model designs for any kitchen. With styles ranging from sleek and modern to single lever or dual handles, the faucets eliminate lead concerns and the satin polish on the stainless surfaces ensures a good-looking faucet for its lifetime. All faucets have ceramic disk cartridges. The stream and sprayheads are constructed of stainless steel, not plastic. **Lenova Sinks.** [www.lenovasinks.com](http://www.lenovasinks.com)
