Sectional showers: Aquatic's new A2 Composite line is ideal for new construction and remodeling projects, particularly when space is limited or later installation is preferred. Made from sheet-molded compound, these four-piece sectional showers are stylish with a smooth wall design, extremely durable, lightweight and easy to install. Select A2 for remodeling projects that require maneuvering through small spaces or around tight corners. A2 also is a smart choice for builders who prefer to install later during construction to minimize damage. **Aquatic Bath. www.aquaticbath.com. Circle 36**

Thermostatic valve: Sunrise Specialty offers a thermostatic valve on its exposed showers. The valve automatically adjusts the hot and cold water to find the ideal set temperature, thus eliminating cold showers or dangerous scalding-hot showers. Sunrise Specialty offers a variety of options including tub-mounted, wall-mounted and floor-mounted units. Also, Sunrise's Thermostatic Exposed Shower Systems offer a versatile design that can be customized to fit traditional and contemporary interiors. **Sunrise Specialty. www.sunrisespecialty.com. Custom shower enclosures: RODA by Basco is a collection of luxury shower enclosures. Every shower enclosure in the RODA collection began with customer-focused innovation. Whether traditional or contemporary, urban or urbane, Basco's designs and customization allows the user to bring his or her vision to life. RODA features eight different collections. **Basco Shower Enclosures. www.bascoshowerdoor.com. Circle 39**

Multifunction shower systems: The stylish new line of multifunction shower systems from American Standard offers five relaxing spray patterns and is available in both modern and traditional designs. Changing the spray pattern with a flick of the thumb is easy, even with wet, soapy hands. The shower system features a five-function hand shower, 24-inch slide bar, a 60-inch reinforced hose and a push-button bracket that easily rotates for left- or right-handed adjustment of the hand shower. **American Standard. www.americanstandard-us.com. Premium bath suites: Symmons Industries' Degas Collection is the newest addition to its family of premium bath suites. The collection is a true transitional design that complements any bath décor. It includes a widespread lavatory faucet, shower and tub/shower system and bath accessories in a variety of finishes. This line can be installed in a variety of commercial and residential applications. Designed and manufactured to withstand high-traffic areas, Degas can fit any application including hospitality properties and many commercial installations. **Symmons Industries. www.symmons.com. Contemporary design: Ideal for the contemporary or modern bathroom, JACLO's Contempo Collection offers assorted fixtures for a clean and simplistic look. The Cylindrico 5 Thermostatic Shower Sets include multifunctional showerheads and handshowers with nebulizing mist. Any shower system can be upgraded or expanded to create a custom shower. Three trim sets and handle options are available. All products are available in 17 popular and standard finishes as well as in custom finishes. **JACLO. www.jaclo.com. Circle 41**
