Product Focus

GREEN BATH & KITCHEN

High-efficiency toilet

Mansfield Plumbing's six QuantumOne pressure-assist, high-efficiency toilets are rated MaP Premium, having passed all high-performance and efficiency standards set by the MaP Testing program. The 1.0 gal. per flush toilets are certified with the WaterSense program and have the ability to move 600 grams or more of waste per flush. Made in the United States, these toilets deliver performance and style with contemporary lines that fit any bathroom decor.

Mix and match

Newport Brass' Roosevelt Bath collection features solid brass construction as well as smooth ceramic valves that meet WaterSense and CalGreen standards. The line includes widespread lavatory faucet, Roman tub fillers, tub and shower trim sets, wall-mount tub faucet, shower thermostatic temperature control valves and bidet set. The collection also includes bath accessories, such as towel ring and bar, double robe hook and toilet tissue holder. Users can mix and match faucets, handles and shower products in 28 finishes, customizing their decor. **Newport Brass. www.newportbrass.com**

Filter faucet

Franke's 3-in-1 filter faucets produce hot, cold and filtered water all from one faucet — reducing the expense and eliminating the waste associated with purchasing bottled water. The faucets pair with the company's filtration app, which monitors usage of filtered water and reminds users when it's time to replace filters. The faucets use a multistage filtration process that kills bacteria and rids tap water of chlorine, chloramine and other chemicals. **Franke. www.franke.us**

Electronic faucet

American Standard's Beale high-arc kitchen faucet collection features a Selectronic touchless model offering the option of switching to manual operation by sliding a movable door to cover the sensor. In addition to this hands-free model, the collection includes a hand-operated, pull-down kitchen faucet and a design-matched manual bar faucet. All three deliver spray and stream performance with a water-conserving flow rate of 1.5 gal. per min. The faucets feature: a metal body, deck plate and ADA-compliant accessible handle; ceramic disc valve cartridges; braided nylon spray hose; and pre-attached, color-coded, stainless-steel supply lines. **American Standard. www.americanstandard.com**

Organic sink

MTI Bath's Continuum sink reuses the countertop cut-out to form a faux bottom of the sink, creating an illusion of the counter material flowing through the sink. Only the top 2" of the sink rim rest on the countertop, although that may be extended up to 4.25" on request. Total dimensions for the sink measure 21" x 16" x 2". Leveling feet are included to support the cut-out in the sink bowl. It is manufactured of a non-porous mixture of natural ground materials and high-performance resins that are 100% solid and easy to maintain. Because nearly 65% of the material is organic, the sink is considered environmentally friendly. **MTI Bath. www.mtibaths.com**

Trade-exclusive collection

Pfister's Avalon and Bronson (pictured) collections are offered exclusively to trade professionals. The Bronson collection includes: widespread and center-set faucet, as well as a tub shower and Roman tub. The lavatory faucet and tub shower, 1.2 gal. per min. and 1.8 gpm respectively, are CALGreen and CEC compliant. Design highlights include fixed hubs, cache aerators on lavatory faucets, SecurePfit handles and a square 6" rain can shower head. The Avalon bath collection lavatory faucet also is CALGreen and CEC compliant, as well as WaterSense certified. Highlights include thread-down hubs, SecurePfit handles and a single-control faucet feature. **Pfister. www.pfisterfaucets.com**
