New Products

Temperature gauge

Legend Valve continues to expand its existing offering of gauges. Its new temperature gauges with thermowell are rear-mount 2" or 3" gauges with either 1/2" male iron pipe or 3/4" solder thermowells and 1" probe. The gauge can be removed without any loss of system pressure and has a temperature range from 60° to 280° F. The Legend technical department can assist with questions about this product and hydronic design requirements. Call 800/752-2082.

Mop sink cabinet

On the heels of its single-door mop sink cabinet, Advance Tabco introduces its new double-width mop sink cabinet (#9-OPC-84D). The cabinet features four fixed shelves, louvered side panels for ventilation, a mop bucket storage area and a slanted roof for ease of cleaning. A mop holder on the sink side secures mops in place. Optional features include door locks and a service faucet. Visit Advance Tabco's YouTube channel to see a video showing the features of this product at www.youtube.com/advancetabco.

Stainless-steel kitchen faucet

Lenova Sinks' new line of solid stainless-steel kitchen faucets has a variety of model designs for any kitchen. With styles ranging from sleek and modern to single-lever or dual handles, the faucets eliminate lead concerns, while the satin polish on the stainless surfaces ensures a good-looking faucet for its lifetime. All faucets have ceramic disk cartridges. The stream and sprayheads are constructed of stainless steel, not plastic. **Lenova Sinks www.lenovasinks.com**

Chimney stack assist kit

Tjernlund Products' new chimney stack assist kit (Model CSA1) allows water heaters to be vented through existing connectors and oversized chimneys. Previously, upgrading to a condensing direct-vent furnace often required installation of a chimney liner for the orphaned water heater. The CSA1 Kit features the use of a mechanical-assist fan to protect against condensation callbacks and flue gas spillage. Installing the kit is a one-person job and doesn't require an electrician. The kit includes a draft hood linear limit safety to lock out the water heater in case of sustained flue gas spillage. The kit contains all components for the installation.

Designer sinks

The Designer Series sinks, the newest additions to the Sloan lavatory product line of SloanStone solid-surface and stainless-steel sinks, now offer five uniquely styled models to accommodate upscale commercial restrooms. The sinks, made of DuPont Corian, come in a variety of colors to match any décor. Custom options are available. The line, which includes a selection of both pedestal and countertop models, is intended for high-end restaurants and hotels, spas, luxury retail centers and executive office restroom suites. The sinks are available in five different styles and offer a wide variety of color options, integration with any of Sloan's deck-mount, sensor-activated faucets and soap-dispensing systems. Standard models include one-, two- or three-user stations (one only for Urban Pedestal). Custom features and dimensions are available. **Sloan. www.sloanvalve.com**
