Green Scene

Toilet for kids

The high-efficiency Elementary Toilet, which uses 1.28 gpf, is easy for kids to use. It includes several safety features such as a slow-closing seat to protect kids' fingers and a cover lock that prevents kids from playing with the tank trim. It is 24" to the top of the tank with a rim height of 11 1/4". This rim height meets ASME's juvenile height standards, as well as TAS standards for 5 to 8 year olds. The toilet joins Mansfield's extensive line of "green" toilets and urinals. **Mansfield Plumbing. www.mansfieldplumbing.com**

Cascade multiple units without an external control box

Navien's NPE-S series condensing tankless water heaters feature an efficiency of 0.99EF. The models supply maximum inputs from 150,000 to 199,900 Btu/hr., and efficient outputs from 148,500 to 197,900 Btu/hr. Maximum flow rates are from 8.4 gpm to 11.1 gpm. Other features include: 1/2" gas pipe capability up to 24', 2" PVC venting up to 60', dual stainless-steel heat exchangers, field gas convertibility and cascade capability up to 16 units without an external control box. **Navien. www.navien.com**

Convenient access inspection port

Weil-McLain's Aqua PLUS line of indirect-fired water heaters feature high-output stainless-steel heat exchangers that deliver great first-hour ratings and recovery. The units' compact size allows for easy installation in low-ceiling basements or storage rooms, and thermostat connections already are installed for quick wiring. Other features include a magnesium anode rod for corrosion resistance and a large inspection port to provide convenient access for tank cleaning and inspection. Built with durability and longevity in mind, these AHRI-certified units are available in five sizes to suit any application. **Weil-McLain. www.weil-mclain.com**

Strong, flexible, pure

Legend's HyperPure polyethylene raised-temperature tubing for potable water systems is strong, flexible and pure, the company notes. This flexible plastic hot and cold potable water tube is 100% recyclable because it is made using a bimodal resin which does not need to be cross-linked. It meets and exceeds the rigorous potable water standards. It is: easy-to-use, compatible with most fitting systems, tasteless and odorless requiring no flushing, available in 1/4" to 2" coils and 20' lengths. **Legend. www.legendvalve.com**

Space-savvy toilet

ICERA's Malibu II is a 1.28-gpf, high-efficiency, space-savvy toilet that combines style with high performance standards. It is available in either a one- or two-piece model. It features: a compact-elongated bowl, fully skirted profile, a soft-close and quick-release seat, ADA-compliant chair-height bowl, an oversize 2 1/8" trapway, 3" flush valve, EcoQuattro flushing system, precision rim jets, and a MicroGlaze non-staining, anti-microbial finish. Crafted of vitreous china, it is available in white and Balsa, and includes a polished-chrome solid-metal trip lever and color-matched plastic floor bolt covers. Other metallic finishes are available. **ICERA. www.icerausa.com**
