Cast-Stone Sink: The designers at J. Aaron have crafted a round cast-stone sink to fit rustic country to contemporary décor. It features an integrated bowl, uses standard plumbing, and is easily adaptable to any space. The sink is 100 percent stain- and acid-proof and requires little to no maintenance. Produced using a high-grade propriety custom concrete mix, it needs no topical sealers that can scratch and peel. Simply clean with a nonabrasive cleaner or just soap and water.

Circle 47

Direct-Vent Chimney Catalog: The Direct-Vent Chimney Product Catalog is a complete listing of Metal-Fab Inc.'s line of 4x6 and 5x8 diameter pipe, fittings and installation kits for every direct-vent gas appliance application. Each pipe and fitting has been engineered and precision-built for optimum appliance performance in both horizontal and vertical configurations. Features heavy-gauge stainless-steel flues that are designed for easy and quick installations that require neither fasteners nor sealants.

Circle 48

Space-Saving Tankless: The new RTG-66DV direct-vent, gas-fired tankless water heater from Rheem meets the hot water needs of a two- or three-bathroom residence, yet takes up no more space than a medicine cabinet. It saves space and reduces installation time through its use of concentric venting. Instead of separate Category III stainless-steel vent runs for the fresh-air intake and exhaust lines, RTG-66DV expels combustion by-products through a 3-inch exhaust pipe that sits inside the 5-inch intake run, thus eliminating the second line.

Circle 49

Eco-Shower: The ergonomically designed Satinjet Tahi Shower System from Methven emits a waterfall of 3,000 droplets per second and consumes only 2.3 gpm, while the handshower with twin-jet performance consumes only 1.9 gpm. Tahi's modular design allows it to fit seamlessly in almost any bathroom installation. Simply add or subtract components, such as generous shelving, a textured footrest, handshower with massage spray option, and overhead drencher shower.

Hot Water Delivery: NIBCO Inc.'s Just Right® is a low-cost hot water circulating device that saves water and energy without sacrificing hot water convenience. This nonmechanical circulating device requires no electricity and extends the life of a water heater. It uses convection to keep hot water rising and cold water falling within the plumbing loop. For residential and light-commercial applications.
