The Window + Door Issue

HIGH STYLE, LOW E

PELLA

The Architect Series contemporary collection of wood windows and patio doors offers clean, thin lines, architectural hardware, and large expanses of glass. Other options include prefinished black interior stain, 27 exterior colors, and a square grille profile.

WINDSOR WINDOWS & DOORS

The company's new contemporary line of products includes a 90-degree window that's constructed on the same frame as the manufacturer's Pinnacle clad product. It's available with a glazed corner post or with virtually unobstructed sightlines. Options include clear select pine, Douglas fir, or natural alder interiors and a painted powder-coat exterior.

MILGARD WINDOWS & DOORS

The Essence swing patio door complements the design and finish of the windows in the same series. It's built with a solid wood interior and a durable fiberglass exterior that is available in 16 powder-coated colors. Design options include grids, decorative glass, and transoms. Door hardware comes in seven finishes.

NOSTALGIC WAREHOUSE

This new line of crystal doorknobs adds a bright infusion of color that lends an unexpected glamour, the manufacturer says. Offered in such hues as emerald and cobalt, the knobs are available in two of the company's most popular styles—Crystal and Waldorf—and may be mixed and matched with 12 different plates. Finishes include antique brass, antique pewter, and bright chrome.

THERMA-TRU

Offering the look of painted wood or steel, the Smooth Star entry door offers crisp, clean lines, but has the durability of fiberglass. It delivers up to four times the insulating value of wood, the company says, but will not warp or rot, and it will not dent like steel. It's shown here in Sherwin-Williams' Emotional.

SIERRA PACIFIC WINDOWS

The H3 FeelSafe line of windows is designed for building requirements along the East Coast. With a DP +50/-60 to meet Zone III ratings, the impact-rated line features a continuous head and sill and a range of design options, including colors, hardware finishes, and SDL bars. Double hungs and casements are available.

PHANTOM SCREENS

The manufacturer says this is the first-of-its-kind motorized retractable screen that extends more than 40 feet wide—beyond the industry standard of 25 feet. It was installed in the 2017 New American Home.

CIRCLE #829

"IN HISTORIC APPLICATIONS, TYPICALLY DOORS AND WINDOWS NEED TO BE ALL WOOD. FOR WINDOWS, THE FOCUS IS ON THE ANGLE OF THE EXTERIOR SILL, THE MULLION AND MUNTIN WIDTH AND HEIGHT, AND THE GRILLE PATTERN, PLUS THE PRODUCT HAS TO BLEND WELL WITH THE ORIGINAL WINDOW."

THE INSULATION VALUE OF WINDOWS AND DOORS IS IMPORTANT TO HOMEOWNERS. ALL OF THE MAJOR WINDOW AND DOOR COMPANIES OFFER A WIDE RANGE OF PRODUCTS WITH GREAT INSULATION PROPERTIES FOR THE HOUSE ENVELOPE. COMPOSITE MATERIALS ARE POPULAR DUE TO THE LOW-MAINTENANCE FACTOR."
