Homeowner Carl Hight wanted a timeless look for his kitchen; thus, all the glazed ivory cabinets are built in. Even the refrigerator is disguised behind cabinet doors. "The refrigerator was my inspiration for the room. Before, I had a stainless steel refrigerator, and it looked too industrial in here. I also incorporated colorful artwork and pottery in the display cabinets and on the countertops because I wanted this area to feel like a part of the main living space." Hight integrated electrical outlets underneath all the cabinets; this way they are out of sight yet readily available whenever needed, he notes.

The Walls Come Down  
and Spaces Open Up in a  
Major Patio Home Redo
