20 *INSPIRING KITCHEN & BATH IDEAS*

If you are installing or updating a kitchen or bathroom, prepare to be amazed. The bag of tricks available to help you accomplish your goal is brimful of possibilities. Here and on the pages that follow are some options we wanted to bring to your attention, either because they are cool, smart, stylish, super-efficient, eco-friendly, or perhaps a combination of these assets. —LJB

Neo-Metro's Ebb Concept Console features a resin deck and is offered in a multitude of color choices, including Yokan, shown here. It is ADA-compliant, the basin can be deep or shallow, and lighting packages are available. How cool is that?

Although Memowell's multicolor Magic Showerhead bathes you in seven colors, we see green: Its LED lights are powered by water pressure alone, and its two-minute color rotation is a reminder of time, encouraging shorter showers and less water use.

Novellini's Cristal Glass Bathtub, part of the company's Premium Elysium Collection, is clearly innovative. Composed of transparent safety glass panels, it comes with its own sleek floor-mounted faucet.

Papillon, from a line of limited-edition Lalique faucet handles for THG, features satin-finished crystal butterflies signed and numbered by their master glassworker. Mounts are available in 30 finishes, including sterling silver, bronze and gold.

Part of Sonia's Play Concept collection, designed to dress up the bath with a combination of sophistication and playfulness, this wall-mounted vanity features a Touch finish that is water-repellent and smudge-free. Shown in Oak Moka and Blackberry, it includes two large soft-close drawers and a versatile accessory organizer.
