Mansfield Plumbing 475HE Suburban

The **475HE Suburban** high-efficiency urinal from **Mansfield Plumbing** has an integral trap siphon jet. It uses 0.5 gallons per flush and complies with ADA requirements for accessibility. It comes with a 3/4-inch top spud and

works with a 1 gpf flushometer valve. It weighs about 35 pounds and measures 14 5/8 by 21 3/8 by 14 3/8 inches. **877/850-3060; www.mansfieldplumbing.com.**

Powers, a Watts Water Technologies Co., IntelliStation

The **IntelliStation** smart delivery system from **Powers, a Watts Water Technologies Co.**, enables commercial and institutional facilities such as hospitals, hotels, universities and multifamily residences to ensure safe and efficient tempered water delivery. The ASSE 1017-listed unit provides fast-response digital temperature regulation of domestic water within plus-or-minus 2 degrees F, even during low- and zero-demand periods. It is easily configurable in the field and does not require factory programming or the use of a laptop computer and proprietary software. A smart controller with a 3.5-inch, full-color touch-screen interface displays about 200 combinations of critical data, including mixed outlet temperature, and mixed and return flow, as well as energy consumption. Sanitization mode allows for high-temperature system purges to address bacteria and controls a recirculation pump to optimize loop performance. The lead-free unit integrates with building management systems for safe and consistent delivery of hot water on demand. **800/669-5430; www.powerscontrols.com.**

Ruvati Maestro RVF1225BN

The **Maestro RVF1225BN** pullout spray faucet from **Ruvati** is finished in shimmering stainless steel with a graceful high-arched spout. Its flexible pullout design and 360-degree swivel make it functional in the busi-

ness of kitchens. A contemporary lever-style handle is in keeping with the faucet's sleek lines and simple silhouette for modern kitchens with a minimalist look. The faucet features solid brass construction for durability and is individ-

ually tested and inspected to ensure quality. It has a splash-free aerated stream and drip-free Kerox ceramic disc cartridge. The faucet can be installed in countertops up to 2 inches thick with one- or three-hole installation options. It includes hot and cold water connection lines and matching deck-plate. **855/478-8284; www.ruvati.com.**

T&S Brass & Bronze Works ChekPoint

ChekPoint sensor faucets from **T&S Brass & Bronze Works** save about a gallon of water per hand wash, as well as reduce the energy required to heat the water. They can reduce the spread of illness-causing germs by eliminating contact with faucet handles. The above- and below-deck faucets come with vandal-resistant outlets, adjustable water shut-off delay and automatic timeout, indicator lights for low battery and troubleshooting, and water-resistant control module to protect electronics. The faucets have multiple power options, including an optional hydrogenerator that uses hydroelectric power and eliminates the need for batteries or transformers. **800/476-4103; www.tsbrass.com.**

Pumps

Ashland Pump effluent pumps

Heavy-duty effluent pumps from **Ashland Pump** are available in multiple horsepower sizes (3/10, 4/10, 1/2, 3/4, 1 and 1 1/2) and efficient, permanent

split-capacitor motors for various performance requirements. The oil-filled pumps have an upper and lower ball bearing design and handle solids up to 3/4 inch. They are made of heavy cast iron, with cast iron impellers and equipped with a piggyback switch (20-foot standard cord) or in manual configurations. **855/281-6830; www.ashlandpump.com.**

Flygt - a Xylem Brand Exporior

The **Exporior** pump from **Flygt - a Xylem Brand** features state-of-the-art hydraulics and premium efficiency motors. Its N-technology and SmartRun control provide optimal wastewater pumping. Other features include adaptive N-hydraulics for clog-free,
