AWARD WINNER

[IBS PREVIEW]

SHOWER DRAIN

The WallDrain from **QuickDrain USA** isn't even noticeable. Unlike a metal grate drain in the middle of the shower floor, the WallDrain is just a slat that runs flush along the wall for a sleek, unobtrusive look. The drain's stainless steel body uses the company's patented Sure Flow System, so there's no standing water. WallDrain comes in three lengths (48, 72, and 96 inches) with extensions available for a custom fit, and the grate assembly can be adjusted to the thickness of the wall's tile or stone covering. **For more info circle 811**

FAUCET

The KWC Zoe Touch Light Pro from **KWC America** is not only sleek and smooth, it also responds to touch. Tap the faucet to alternate between cold, warm, and hot; a light display shows which temperature is activated. Users can preset temperature and flow-rate preferences. A button activates the Luminaqua LED feature, which is a light that surrounds the spray head and shines to color the water. A durable metallic shell houses the pull-out hose, and the twist-off faceplate is easily removable. **For more info circle 812**

CORDLESS NAILER

Light and easy to maneuver, the 16 Ga Straight Cordless Finish Nailing System from **Paslode** can now run on a 7.4-volt lithium-ion battery platform. The upgrade from a nickel-cadmium battery allows the nailer to drive up to 12,000 nails per charge, lasting several days without the need to recharge. The lithium-ion batteries have a 50 percent longer run time and can charge 80 percent to capacity in just 30 minutes. The battery can also enter a stand-by position when not in use, which conserves power. Included with the 4.6-pound nailer is a belt hook, depth-of-drive thumb wheel, and a no-mar tip that protects wood surfaces. **For more info circle 815**

CIRCULAR SAW

Built specifically for cutting metal, the **Bosch CSM 180 Metal Circular Saw** has a four-pole ferrite motor that gives 18-volt, 3,800 rpm performance. The saw is small (14x7 inches) and light (5.8 pounds), so it's easy to handle in tight spaces when cutting copper piping, conduit, steel studs, Unistrut, or threaded rod. A steel footplate, cut-line guide, impact-resistant window, and LED light help the user cut more accurately. The saw has single-cell monitoring with 5.0 AH batteries and comes with a 5 1/2-inch thin kerf 30-tooth carbide blade. **For more info circle 813**

PATIO FAN

**Kichler** has updated its Terna Patio LED light and fan for use in damp locations. Designed for use on patios and in kitchens, the Terra has a twisted metallic shape with exterior fins that provide diagonal airflow. Among the available finishes are weathered steel and tannery bronze. The 120-volt fan weighs 15 pounds, has a 15-inch blade sweep, and can be controlled remotely. **For more info circle 814**
