[FAUCETS & FIXTURES]

BATH FAUCETS

Pfister's Tisbury line of classical bath faucets, fixtures, and accessories is defined by its mix of long, drawn-out curves and tightly finessed ogee curves inspired by the fixtures on steamships, classic trains, and in grand hotel suites from more than a century ago. Polished Nickel, Polished Chrome, Brushed Nickel, and Tuscan Bronze finishes are available, and the collection of 16 configurations comes in both cross- and lever-handle options. **For more info circle 807**

KITCHEN FAUCET

The softened-rectangular shape of the Metris Select HighArc Kitchen Faucet from **Hansgrohe** is functional as well as attractive. The 150-degree swivel spout range faucet has a pullout spout, which increases the operating range by 20 inches, and a magnetic attachment that reconnects the spout to the faucet body after use. A button starts and stops water flow, and the unit allows for preset temperature and volume settings. The Metris Select comes in a Chrome finish.

HANDS-FREE BATH FAUCET

The B3004 vessel faucet by **Cinaton** features iSense technology for hands-free operation. Five infrared sensors control 13 functions, from temperature to water flow. The faucet has three presets and a maximum temperature setting to prevent accidental scalding. Intermittent water flow and an automatic shutoff feature help the B3004 save water (up to 70 percent). Made of solid brass, the faucet comes in two finishes: Brushed Nickel and Polished Nickel with a PVD coating.

PULLOUT FAUCET

Clean lines, soft curves, and smooth cylindrical shapes make the Method pullout kitchen faucet from **Moen** a good fit for contemporary kitchens. The single-hole installation faucet has a two-function pullout wand with a 1.5-gallons-per-minute flow rate. The Power Clean spray reduces water use, minimizes splashing, and cleans items 50 percent faster than most other Moen pull-down and pullout faucets, according

to the manufacturer. The Duralock Quick-Connect System uses a push-button connector that installs the faucet quickly without the need for tools. It comes in two finishes, Chrome and Spot Resist Stainless, which repels fingerprints and water spots.

BATH FAUCETS

Colony Pro bath faucets from **American Standard** have durable metal faucet bodies, flexible stainless steel braided hoses, and ceramic disc valves to prevent dripping. The faucets deliver 1.2 gallons per minute and come in Bronze, Chrome, and Satin Nickel finishes. Configurations include monoblock, 4-inch center-set single-handle, 4-inch center-set two-handle, and 8-inch widespread.
