14 KBIS 2012 'COLLABORATION'

PR to moderate show panels with NARI, NKBA, CEDIA members

16 BUILDING SCIENCE:

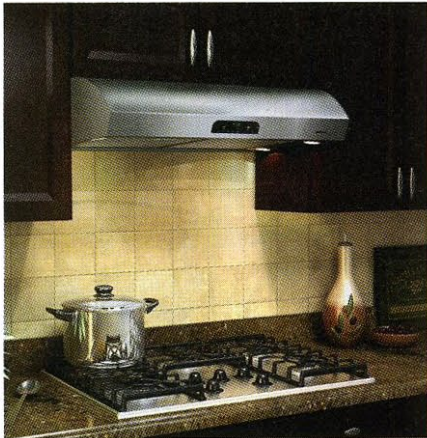

Proper air sealing and insulation

36 PROJECT SPOTLIGHT:

Flawed home becomes a riverfront showplace

Kitchen & Bath Issue

Solutions from top firms, design tips and the latest product trends

↑ **Broan Evolution Series Range Hoods**

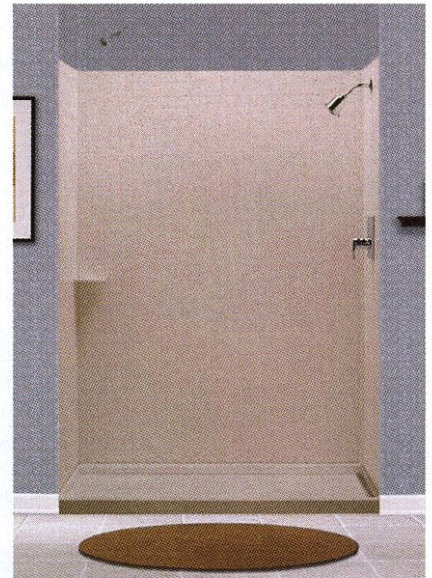

The QP4 marks the latest iteration of Broan's Evolution series of range hoods. The ventilation system is ultra-quiet, maxing out at 7.5 sones at boost setting. Lighting is provided by four halogen lamps, which can be adjusted to four different settings with theater-style transitions; nighttime lighting is automatic thanks to ambient sensors. All four models are available in 30-, 36- and 42-inch widths and several color options.

➔ **American Standard Ciencia**

These shower wall and base systems can simply be glued on top of existing tile, concrete or sheetrock. The bases feature a trench drain available in numerous sizes and come with removable drain covers. The collection also includes acrylic-capped bases with bright white, high-gloss, slip-resistant surfaces. Five distinct tile patterns are available in four different colors. All surfaces are non-porous to make cleaning easier.

← **Tekura Morphosys Stainless Steel Panels**

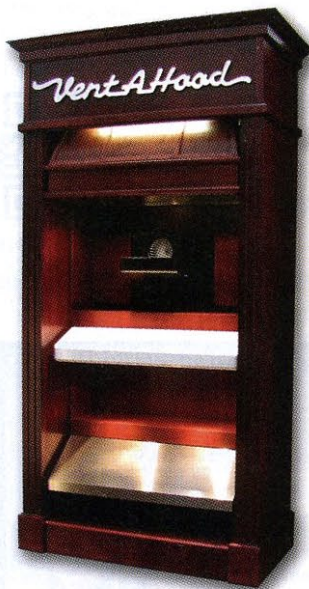

Tekura now offers these magnetic stainless steel panels to complement its line of bathtubs. Their magnetic nature allows users to change them as often as they want, choosing from a wide variety of colors, textures and designs. The bathtubs themselves provide a variety of therapies, including hydro-thermo massage, aromatherapy, chromatherapy and sound therapy. Each tub also makes use of the MyBodyrest kit collection with various therapeutic accessories.

➔ **Vent-A-Hood Cherry Finish Displays**

Vent-A-Hood has added a cherry wood finish to its latest line of hoods. Single, and triple units are all part of the new line, as well as a freestanding island unit that doesn't require a showroom wall. All displays can be fitted with Vent-A-Hoods range hood canopies and other designs according to the desired style.

2 Kirei Windfall Reclaimed Wood Engineered Panels

The wood in these new panels from Kirei comes from demolition sites in the Pacific Northwest, home of manufacturing partner Windfall Lumber. The panels are all Douglas or hemlock fir with a natural wood grain pattern. Buyers can receive the panels stained in Anthracite, Mocha, Ivory or Leather colors; they can also leave them unfinished to highlight the natural grain. They come in 27x96 inch or 48x96 inch sizes.

3 Moz Designs Metalwoodz Laminate Sheets

The Metalwoodz line from Moz offers either a satin or gloss finish to these aluminum surface coverings, which are 85 percent recycled material. They can be applied as column covers, ceilings, canopies and keyway or terraced wall panel systems. Panel sizes include 4x8 feet and 4x10 feet; all panels are .040 inches thick. Designs include Honduran Mahogany, Brazilian Cherry, English Walnut and European Beech.

4 Mapei Planiprep Surface Preparation Products

Three new products from Mapei offer an alternative to the labor-intensive, expensive shotblasting process when prepping a floor for remodeling. Planiprep AR (Adhesive Remover) softens and lifts any adhesive residue from the concrete subfloor; Planiprep SA (Scouring Agent) gets rid of the AR residue and etches the concrete; and Planiprep ET (Epoxy Treatment) caps the concrete, controlling moisture emission.

5 Kolbe Ultra Series TerraSpan Lift and Slide

This new line of doors from Kolbe is highly durable, featuring high impact resistance and top-notch storm protection. Each door is custom-designed using BIM software for the perfect fit. The 10-foot-tall units can be configured in 900+ different arrangements; the exteriors sport low-maintenance extruded aluminum and are available in more than 35 colors. Climate-appropriate, high-performance glass options are also available.
