Showplace Universal Design Cabinetry →

Designed in collaboration with Häfele, this line from Showplace Wood Products emphasizes adjustable features to create accessible living space. Options include adjustable shelving, roll-out trays, gas-assisted pull-down shelving, and removable-top drawers for working surface at seated height. All of the company's wood species, styles, and finishes are available for this line.

For more information, No. 800 on reader service card.

↑ **Moen 1800 Series Sinks**

Moen added three new styles to these stainless steel sinks, which are wear-resistant with SoundShield noise reduction. Apron-front sinks come with a large single bowl or double bowl. The 18-gauge Professional Line sinks feature a large single bowl; double, equal-sized bowls; large/medium, offset double bowl; or a prep sink. Finally, the D-shaped sinks come with a large single bowl, prep sink, bar sink, or round bar sink.

For more information, No. 801 on reader service card.

← **Häfele Cabinet Lifts**

Greater design flexibility is the key with these cabinet lifts. The low reachable handle minimizes user effort and keeps the lift in the open position. They also save space by gliding up and out of the way, as opposed to swinging out front. The four models include: Free (one-piece doors); Senso (two-piece doors; ideal for heavier doors up to 50 pounds); Strato (glides parallel to face of cabinet); and Verso (travels up and over the cabinet for total visibility).

For more information, No. 802 on reader service card.

↑ **Brizo Vuelo Kitchen Collection**

Brizo offers a variety of split finishes—such as Polished Chrome and Matte White—for this faucet collection. All faucets are single-handle, single-hole, with four different configurations: pull-down, high-arc pull-out, waterfall (with optional side sprayer), and pull-down bar/prep. The new line also offers optional SmartTouch technology to start and stop the flow of water with a tap anywhere on the fixture. A matching bud vase, soap dispenser, and optional 8-inch escutcheon are also available.

For more information, No. 804 on reader service card.

← **Wessex Tub**

Developed from Victoria + Albert's EnglishCast composition of volcanic limestone and high-performance resins, this freestanding tub is naturally insulating, keeping water warmer longer. EnglishCast is stain-resistant and customizable with faux finishes or custom paint jobs. The tub itself measures 59-7/8-inches long x 30-1/8-inches wide x 15-3/4-inches deep. The classic Edwardian design features ball and claw feet, available in a number of finishes.

For more information, No. 803 on reader service card.
