NEW + NOTEWORTHY

ISENBERG
 Inspired by the industrial-chic trend, the Klassiker faucet collection has more traditional proportions but still offers a linear look. It's made from stainless steel and uses ceramic disc valves. Options include a ribbed neck design, a spring spout, and an industrial-grade rubber hose cover. It comes in 20 colors.

HENNEPIN MADE
 The Halo Series is a collection of blown-glass fixtures consisting of three shapes—Cone, Globe, and Dome (shown). Each shape features an interior ring folded into the glass like a halo floating within the shape. It comes in six colors and uses an incandescent or LED bulb.

BENJAMIN MOORE
 Century is a curated collection of 75 deep, rich colors featuring the first Soft Touch Matte finish. The formulation is made in small batches that will be pre-mixed and sealed to ensure the truest color.

VICTORIA + ALBERT
 The company's Kit 40 Intelli Waste system uses magnetic technology to provide flood protection for its freestanding tubs that do not have a pre-drilled overflow. It works like a standard "click clack" drain, except the concealed system uses water pressure to sense rising water levels. When the depth of the water reaches 15 inches, the plug opens.

LENOVA
 A modern interpretation of the classic farmhouse sink, the Permaclean apron-front sink combines sleek lines and a graceful 10-inch bowed front. An engineered platform ledge accommodates an optional colander, roll-up grid drainer, and cutting board, converting the sink into a food prep center. It comes in single- and double-bowl options.
