NIAGARA CONSERVATION

This one-piece, single-flush toilet uses only 0.8 gallon of water. Featuring the company's Stealth technology, the flapper-less unit uses a combination of air and water and has a smooth, low-friction ceramic surface that helps achieve a clean bowl.

LEICHT

The manufacturer's unusual cabinet line features fronts made from concrete that is hand-applied to a lacquered MDF base, resulting in a surface with varying light refraction. A matte lacquer ensures durability. Various colors are available.

"When it comes to selecting fixtures, I look at quality and aesthetics. For me, quality isn't just about how well a product is made or about how it feels: Energy efficiency is something I take very seriously with all of my projects, so it's also important that faucets and toilets be as efficient as possible. Of course, looks do matter too; I always prefer something that's modern, minimal, and geometric."
