01 **Diamond Spas'** Stainless Steel Lounging Tub, also available in copper, is 36-inches wide by 60-inches long by 24-inches deep. The tub, which is fully skirted with a flat bottom and fully reclined back, is manufactured from recycled sheet metal. The stainless steel model contains between 60 and 80 percent recycled content while the copper is 90 to 95 percent recycled content. Both shells are fully recyclable at the end of their life. **Circle 01 or visit ForResidentialPros.com/10615715**

02 **American Standard** has released the Studio and Boulevard dual-flush toilets. They use 1.6 gallons per flush for solids and 1.1 gallons per flush for liquids, which is 20 percent less water than standard models. The Studio models have an elongated round front and the Boulevard collection is a one-piece, elongated model. Both have a finish that inhibits stains, bacteria, mold and mildew. **Circle 02 or visit ForResidentialPros.com/10615529**

03 **Toto USA** has introduced the Wall-hung Gooseneck EcoPower faucet, which consumes 0.09 gallon per 10-second cycle. The faucet, with a 7 1/2-inch-high arch, uses smart-sensor technology and infrared light to detect the presence of hands before discharging. It records daily use for a week; during periods of infrequent use it reduces its infrared pulse to conserve power. **Circle 03 or visit ForResidentialPros.com/10615507**

04 **Kirei USA** has released the Java Collection with in its Kirei Coco Tiles line, which consists of reclaimed coconut shells. The tiles, which are manufactured with low- or no-added-formaldehyde adhesives, can be used for wall coverings, backsplashes and other interior-design elements. **Circle 04 or visit ForResidentialPros.com/10604368**

05 Induction cooktops from **Miele** transfer heat directly into cookware via an electromagnetic current. The cooktop will only heat the pan when it is in direct contact with the surface. No residual heat escapes into the air. The precision heating provides for a cook time 50 percent faster than gas or electric cooktops. **Circle 05 or visit ForResidentialPros.com/10615545**

06 The low-flow Fontaine faucet by **GRAFF** uses an aerator, which reduces water flow to 1.5 gallons per minute. Polished chrome and Steelnox satin nickel finishes are available. The geometric design lends an Art Deco feel to the lavatory faucet. **Circle 06 or visit ForResidentialPros.com/10615562**
