LED retrofit downlight

NORA LIGHTING introduces Onyx, an LED retrofit downlight for residential or light commercial sites. Available in 4-, 5- and 6-in. apertures with baffle or reflector trims, the downlight has deep-set optics for even illumination. The 4 in. produces 450 lumens, while the 5 and 6 in. have 750 lumens; all are dimmable, include an integral driver and are CULUS wet label listed. With a medium base socket adaptor for retrofitting in recessed housings from the company and others, the light comes with a white finish in a soft edge baffle. [Circle 28 on inquiry card](#)

Thermostat, app allow continued homeowner support

The Luxaire residential touch-screen thermostat from **JOHNSON CONTROLS** means the company can now offer a complete home comfort system. Engineered and designed to ensure system fit and integration with the company's products, the thermostat is also compatible with any conventionally wired HVAC system. Featuring short-range wireless connectivity or near field communication, the thermostat has a dedicated distributor app – available on Android-equipped devices – allowing a contractor to pre-configure settings and provide ongoing remote support. Sensors, software within unit monitor for water leaks

DELTA FAUCET COMPANY addresses concerns caused by water-related issues with its Delta Leak Detection, which uses a combination of connected sensors and software to deliver peace of mind. Designed with iDevices, two concentric rings of conductive metal within the unit monitor for the presence of unwanted water, and an automatic alert is sent to a connected smartphone or tablet. The unit communicates directly through a home's Wi-Fi network, is compatible with iOS and Android devices via a free app and will be available in the fourth quarter. [Circle 30 on inquiry card](#)

Architect creates 35 design laminate collection

WILSONART partners with architect Andre Kikoski, AIA, to launch the Andre Kikoski by Wilsonart collection. Taking inspiration from the organic qualities of nature and inspired material looks, the collection includes a range of patterns, and manipulates scale, texture, contrast, inversion and color. The 35 designs can be broken down into categories of nature, luxurious materials, urban surfaces and geometric art. Available as part of the company's "Collaborations" category of the Virtual Design Library, the laminates are available two to three weeks from order. [Circle 31 on inquiry card](#)

Bathtub shape inspired by waves

VICTORIA + ALBERT takes inspiration from the sea in the design of its Pescadero tub, which features an undulating rim formed to look like an asymmetrical wave. Named after the seaside town in Northern California, the tub has a deep and double-ended bathing well, measuring 68 5/8 in. long, 29 5/8 in. wide and 23 1/2 in. tall. The bathtub is crafted from Englishcast – a finely ground volcanic limestone mixed with resin. Six external finishes are available: gloss black, anthracite, stone grey, light grey, matte black and matte white. [Circle 32 on inquiry card](#)
