16 American Marazzi Tile has released its Riflessi Di Legno, which repurposes conventional wood graining into porcelain tile. Five authentic hardwood colors—ash, cherry, ebony, oak and walnut—can be used in areas where ADA-compliant slip resistance is important. The series is available in 12- by 24-inch, 6- by 24-inch and 4- by 24-inch sizes. Its rectified sides make it an option for walls, too. **Circle 16 or visit directory.qualifiedremodeler.com/10316218**

17 DuChateau Floors has introduced its Riverstone Collection, hand-sculpted, naturally distressed hardwood floors. The 7 7/16-inch-wide planks are 72-inches long and 5/8-inch thick and are treated with a zero-VOC hard wax oil for a durable matte finish. Made of FSC-certified woods, the collection is available in Arno, Danube, Rhine, Seine and Thames finishes. A stair nose, T-mold, reducer and baby threshold, as well as custom pieces, are available. **Circle 17 or visit directory.qualifiedremodeler.com/10313639**

18 BR-111 has released its kingsbridge oak flooring as part of its Reserve Collection. The wood flooring has a contemporary and rustic look with 8-inch-wide, 3/4-inch-thick planks and a brushed texture. It features an oxidized oiled finish and white-washed French oak. The flooring is available in 30- to 84-inch lengths with a 5-mm wear layer. **Circle 18 or visit directory.qualifiedremodeler.com/10313509**

Shower Bead

Finish Tubs & Showers
in half the time!

**2011 Catalog
Now Available!**

Architectural Series
Demarcation Bead
Auto Mixer
Shower Bead
Accessories

Designed to quickly and easily finish drywall terminating to shower/bath enclosures.

Uses less drywall compound than filling the gap while the tear away strip protects the shower/tub flange from mud.

Features an extra wide mud leg allowing you to simply staple the shower bead to the drywall.

LEED®

Easy^{ier}

Our **NEW** expanded line of automatic-locking **Quick-Connect®** fittings just made cable railing installations a lot easier. They offer the flexibility of field assembly and the speed and gripping power of **Quick-Connect®** jaws. Just insert the cable into the fitting, and the one-way jaws lock on; it's that easy.
