Products **FirstLook**

Nora Lighting. LED high-output tape light produces four times the illumination of standard flexible tape lights, offering output of 270 lumens per foot. Suitable for cove lighting, display or kitchen cabinets, and other architectural niches, the tape light is also a solution for lighting home show displays and exhibits. Title 24-compliant and rated for 50,000 hours, the LED high-output tape light puts off no forward heat, UV, or infrared radiation. The silicon-encapsulated tape measures $\frac{9}{16}$ inches wide and $\frac{1}{16}$ inches thick and is field-cutttable every 4 inches. Available in 16-foot rolls with 66 watts per roll. 800.686.6672. www.noralighting.com.

American Clay. Adding a clay plaster aesthetic to walls just got easier. With the *Up & EZ! binder material*, a roll-on application of American Clay plaster interior finishes is now available. The re-emulsifiable and repairable binder can be added to any color-integral American Clay Legacy product to make it a roll-on product and it also serves as a hardener. After rolling on the material with a $\frac{1}{4}$ -inch nap roller, applicators can use the trowel to create the desired texture. The product eliminates the messy hawk-to-trowel process that can intimidate users not accustomed to working with plaster. 866.404.1634. www.americanclay.com.

Template. Simplify the messy and time-consuming process of repairing drywall knock-down treatment with the new *Drywall Repair Tool*. The flexible plastic template features a random knock-down design that lets users replicate the knock-down texture of the rest of the wall after a drywall repair has been made. Requiring only spackle and a putty knife, the process is much cleaner than using a spray

application. Three knock-down designs help ensure a match to common knock-down patterns. Templates are available individually or in a Drywall Repair Tool 3-Pack. 800.331.6637. www.drywallrepairtool.com.

Lenova. The *PermaClean Drain System's* streamlined design provides a stylish solution to the traditional kitchen sink. Disposal and drain seams are eliminated for a smooth and sanitary look. No seams mean no dirty water or debris that breed bacteria, and no drain kits are required. The PermaClean system features removable splash guards that are dishwasher safe and strainer baskets that seal to both the drain fitting and the garbage disposal. The sink line is constructed of 16-gauge 304 stainless steel, is fully undercoated, and features sound pads to insulate and reduce noise and vibration. 877.733.1098. www.lenova.com.
