### VINTAGE GLAMOUR

MTI Baths teams up with Palmer Industries to create custom vanities

MTI Baths, well known for its endless customization options, has teamed up with Palmer Industries, a domestic manufacturer of metal console leg systems to offer a new bath vanity collection. The new Boutique Collection tops with Palmer® legs combine the vintage charm of a classic open-framework console with the benefit of modern fixtures.

As stylish as it is functional, the integrated sink top is made from MTI's signature one-piece SculpureStone® material. This material is non-porous, stain, mold and mildew-resistant, making cleaning and maintenance easy. The Boutique Collection tops with Palmer® legs come in two styles: traditional with a round or oval sink; cove edge treatment and tapered foot console legs; or modern with a rectangular sink and studio console legs. Offered in lengths of 24", 36" or 68", the 24" and 36" accommodate a single bowl, the 68" two bowls. The tops are available in a matte or gloss finish.

The Palmer console leg system is fabricated from solid brass tubing and components. All leg fittings are precision machined, from solid rod, producing an exceptional fit and finish not possible with casting. The console legs are available in six standard finishes, architectural grade, polished and plated to perfection. Custom finishes are available.

Evoke the charm of yesteryear with the timeless details and graceful forms of MTI's Boutique Collection tops with Palmer® legs. Please visit [www.mtibaths.com](http://www.mtibaths.com) for more information.

### A TIMELESS BEAUTY

Victoria + Albert's new Trivento brings the classic bateau bath into the 21st century

Known as a bateau bath or 'boat bath', these timeless beauties have not lost their popularity or appeal. Today, the freestanding bath experts at Victoria + Albert have unveiled a modern reinvention of this classic bateau bathtub, named Trivento.

Featuring a fine rim and a deep, double ended bathing well, Trivento is equally at home in city apartments or family bathrooms. Combining the clean lines of a modern aesthetic with the graceful curves of a classic silhouette, the Trivento was designed to provide support for a luxurious bathing experience.

Measuring a comfortable 22-7/8" high by 27-7/8" wide and 65" long, the Trivento works with Victoria + Albert's Kit 40 Intelli-waste bath drain. It is crafted from the brand's signature ENGLISH-CAST® composition – a naturally white material rich in Volcanic Limestone™ that is beautifully warm to the touch and hand finished by craftsmen to create a glossy finish that is highly durable and easy to clean. Traditionally, ENGLISHCAST® has been available in a natural gloss white finish. However, all Victoria + Albert Baths are now available in seven distinctive external finishes, including gloss white, gloss black, matte white, matte black, anthracite, stone grey, and light grey.

For more information about Victoria + Albert's products, please visit [www.vandabaths.com](http://www.vandabaths.com) or call 1-800-421-7189.

# ON TREND IN KITCHEN & BATH

**GREAT DESIGN IS ALWAYS IN STYLE.** Trends may come and go, but great design is in perpetual demand. This is especially true in the kitchen and bath market where exceptional products are both expected and sought-after.

**YesterTec** brings design freedom to the kitchen, replacing traditional “permanent” cabinetry with their **Kitchen Workstation Furniture (KWF)**. Grouped together or as stand-alone pieces, they provide the full spectrum of kitchen functionality while delivering good looks, discrete storage and design flexibility. [yestertec.com](http://yestertec.com)

↑ With superb engineering, **QuickDrain USA's** linear drain shower systems are made from high quality stainless steel and are engineered to keep water from accumulating in the trough after use. Their drain cover designs incorporate beauty, practicality and performance. [quickdrainusa.com](http://quickdrainusa.com)

↓ Comfy and curvaceous, **Addison 5** by **MTI Baths** is minimalist in design, space-conscious and reminiscent of the luxurious spa setting. Crafted from MTI's signature one-piece **SculpureStone®** material, which is non-porous, stain, mold and mildew-resistant, making cleaning and maintenance easy. [mtibaths.com](http://mtibaths.com)

↑ Inspired by beautiful sea vistas and the beckoning horizon lines of exotic oceans, the **Wave Collection** from **DuVerre Hardware** plays with light and texture in a most compelling way. Made from eco-friendly recycled aluminum hardware, the knobs and pulls are available in Satin Nickel, Antique Brass and Oil-rubbed Bronze. [duverre.com](http://duverre.com)

→ **Lenova's** new **NovaGranite Apron Front Ledge Sink** combines exceptional good looks with serious hands-on practicality. One of the most notable aspects of this remarkable sink is its engineered platform ledge that allows it to easily convert to a food prep center when accessorized with a stainless steel colander, roll-up grid drainer, and bamboo cutting board. Made from a mix of 85% crushed granite powder and 15% organic and food safe binding materials, the high density of granite in this composite sink makes them highly resistant to scratches, chips and stains. Available in black or white. [lenovasinks.com](http://lenovasinks.com)
